OCCUPATIONAL WAGE SURVEY SEVENTH ROUND (2017)

REPORT

ON

FOUR MINING INDUSTRIES (July 2016 – December 2016)

**GOVERNMENT OF INDIA
MINISTRY OF LABOUR & EMPLOYMENT
LABOUR BUREAU
CHANDIGARH/SHIMLA**

PREFACE

A progressive and realistic wage policy is instrumental in attaining social objectives such as the elimination of exceptionally low wages, reduction in wage differentials and protection of wage earners from the effects of rising prices. For formulation of such a wage policy, availability of scientifically collected and reliable wage data is a prime requisite. The first step in this direction was taken by the Ministry of Labour & Employment by entrusting the Labour Bureau to conduct the first round of Occupational Wage Survey (OWS) in 1958-59. Since then the Labour Bureau has conducted six rounds of the survey. During these surveys, a multidimensional wage structure has been analysed in selected industries and a composite wage spectrum was obtained, throwing adequate light on occupational wage differentials in payroll earnings.

The Seventh Round OWS, 2017 report on Four Mining Industries (Coal Mines, Iron Ore Mines, Manganese Mines and Oil Mines) presents statistics on Employment Structure, Wage Rates, Dearness Allowances and Average Daily Earnings by Occupation and Industry/Stratum. The Report also partially meets the obligations under Article 8 of Part-II (Average Earnings and Wage Structure & Distribution) of the ILO Convention No. 160 on Labour Statistics. I hope that the data presented in this Report would be useful to the users.

I take this opportunity to express my gratitude to all employers and employees of the Four Mining Industries at different places for extending their whole hearted cooperation enabling Labour Bureau in timely collection of data. The officers and staff of the Bureau also deserve praise for the hard work put in by them in the planning and execution of the survey as well as in preparation of the present Report. I would also like to thank the Chairman and the members of the Technical Advisory Committee, constituted by the Ministry for examining the various technical aspects of OWS, for providing useful inputs in the finalization of the report.

Suggestions for further improvement in the OWS reports are welcome.

Dr B. N. Nanda
Sr Labour & Employment Adviser
& Director General (In-Charge)

Chandigarh
May, 2018

MAIN FINDINGS OF THE SURVEY

The important findings of the Occupational Wage Survey conducted for the Mining Industries are given below.

INTRODUCTION

1. The survey covered Four Mining Industries, viz., Coal Mines, Iron Ore Mines, Manganese Mines and Oil Mines under the seventh round of the Occupational Wage Survey.
2. The field work for Four Mining Industries was carried out during July, 2016 to December, 2016.
3. Information was collected from 231 sample units, which accounted for 23.36 percent of the total number of units (989) in the frame.

STRUCTURE OF WORK FORCE

4. The total number of workers in 4 Mining Industries is estimated to be 4.06 lakhs. Out of these, 3.14 lakh workers were manual workers (77.43 percent) and remaining 0.92 lakh workers were non-manual (22.57 percent).
5. Coal Mines had maximum share (80.53 percent) in the total workforce, followed by Iron Ore Mines (9.23 percent), Oil Mines (6.13 percent) and Manganese Mines (4.11 percent).
6. Out of the total 3.14 lakh manual workers in Four Mining Industries, a vast majority of workers i.e. 97.84 percent were men and remaining 2.16 percent were women. None of the mines reported employment of adolescents and children.
7. Majority of workers i.e. 97.60 percent were employed by the time-rated system and the remaining 2.40 percent by piece-rated system.
8. The highest percentage of total work force was employed as Coolie/Mazdoor (17.58 percent), followed by Fitter and Trammer Underground occupations with a share of 9.21 percent and 6.41 percent, respectively.

WAGE RATES AND DEARNESS ALLOWANCE

9. The average daily wage rates of men and women workers for all mining industries combined together were Rs. 1249.32 and Rs. 822.75, respectively. The average daily wage rates for all the workers of all mining industries worked out to be Rs. 1240.12.
10. The average daily wage rates worked out to be Rs. 1338.16 in Coal Mines, Rs. 700.13 in Iron Ore Mines, Rs. 712.92 in Manganese Mines, Rs. 1118.35 in Oil Mines.
11. The average daily wage rates of women workers were less than that of the men workers in all the mining industries. The

average daily wage rate of women workers was higher than that of their men counterparts in 7 occupations in Coal Mines, 5 occupations in Iron Ore Mines and 2 occupations in Manganese Mines. No women workers were reported in Oil Mines.

12. In Coal Mines, the highest and lowest average daily wage rates were reported in Picker (Rs. 2155.76) and Trainees/Apprentices (Rs. 589.10) occupations, respectively. In Iron Ore Mines, the highest and lowest average daily wage rates were reported in Winch Driver (Rs. 2168.13) and Trainees/Apprentices (Rs. 222.64) occupations, respectively. The highest and lowest average daily wage rates in Manganese Mines were reported in Dumper Operator (Rs. 2298.37) and Ore Washing Operator (Rs. 216.63) occupations, respectively. In Oil Mines, the highest and lowest average daily wage rates were reported in Mate/Mukkadam (Rs. 3857.84) and Storekeeper (Rs. 161.00) occupations, respectively.
13. The highest change in real wage rates during seventh round i.e. 99.30 percent was observed in the Manganese Mines, followed by 43.72 percent in Coal Mines, (-)8.43 percent in Iron Ore Mines and (-)33.75 percent was reported in Oil Mines.
14. Dearness allowance as a separate component of wages/salaries was paid in 74.22 percent of units covering 89.48 percent of the workers in Four Mining Industries.
15. Among different Mines, 93.54 percent units in Coal Mines, 42.13 percent units in Iron Ore Mines, 55.12 percent units in Manganese Mines and 68.24 percent units in Oil Mines were paying dearness allowance to their employees.

PAYROLL EARNINGS

16. The overall average daily earnings of men, women and all workers in the Four Mining Industries worked out to Rs. 1419.95, Rs. 1049.10 and Rs. 1411.94, respectively.
17. The earnings of women workers were more than that of their men counterparts in 9 occupations in Coal Mines, viz. Coolie/Mazdoor, Electrician, Helper, Sweeper, Clay Cardidge Maker, Dresser, Haulage Khalashi, Coal Safety Lamp Checker and Shalepicking Mazdoor; 3 occupations in Iron Ore Mines, viz. Helper, Machine Operator/Machinist and Screener and Cleaner and 3 occupations in Manganese Mines, viz. Coolie/Mazdoor, Helper and Mate/Mukkadam.
18. The earnings of piece-rated women workers were more than that of their men counterparts in Miner occupations in each of the three Mining Industries, Coal Mines, Iron Ore Mines and Manganese Mines.
19. The average daily earnings of men workers were the highest at Rs. 1515.11 in Coal Mines, followed by Rs. 1470.81 in Oil Mines. Similarly, the average daily earnings of women workers was the highest at Rs. 1404.72 in Coal Mines, followed by Rs. 685.18 in Manganese Mines Industry.

20. The highest average daily earnings in different occupations were reported for Checker (Rs. 3934.13) in Coal Mines; Chargehand (Rs. 2203.35) in Iron Ore Mines; Dumper Operator (Rs. 2278.17) in Manganese Mines and Mate/Mukaddam (Rs. 4628.20) in Oil Mines. On the other hand, the lowest average daily earnings were reported for Trainees/Apprentices (Rs. 396.26) in Coal Mines; Hammerman (Rs. 267.80) in Iron Ore Mines; Grinder (Rs. 299.73) in Manganese Mines and Plumber (Rs. 261.00) in Oil Mines.
21. The average daily earnings of time-rated workers were recorded at Rs. 1420.88 and that of piece-rated workers at Rs. 1048.66.
22. Basic wages and dearness allowance accounted for 87.13 percent of total average daily earnings.
23. The average daily earnings of 42.65 percent of workers were in the range of Rs. 1500.01 to Rs. 2000.00 per day, followed by 22.87 percent workers between Rs. 1000.01 to Rs. 1500.00 per day.
24. The highest change in real earnings has been reported at 94.46 percent in Manganese Mines, followed by 45.17 percent in Coal Mines, 8.60 percent in Iron Ore Mines and (-)19.86 percent in Oil Mines.

CHAPTER-I

INTRODUCTION

1.1 GENESIS OF THE SURVEY

From time to time, the Government of India has constituted various Commissions and Committees, viz., Royal Commission on Labour (1931), Labour Investigation Committee (1944-45) and various wage fixing authorities to look into the subject of wage rates in the industrial sectors. Almost all such Commissions and Committees have critically commented on the absence and inadequacy of wage data for different occupations in the industries. Consequently, the need for reliable and accurate statistical data on occupational wage rates and earnings assumed greater importance in national planning for labour welfare.

It was because of these limitations and deficiencies in the occupational wage data that in the Second five-year Plan, it was recommended that "urgent steps should be taken to undertake a Wage Census...". The Steering Group on Wages set up by the Ministry of Labour and Employment made a similar recommendation. In pursuance of these recommendations, Labour Bureau conducted an Occupational Wage Survey (OWS) during 1958-59 covering 44 industries comprising 37 manufacturing, 4 mining and 3 plantation industries. The objective of the survey was to disseminate information relating to wage rates and average earnings of workers in different occupations in selected industries. The data disseminated through the conduct of the OWS is also used for building up/replacing the weighting diagram of the Wage Rate Indices (WRI) being compiled by Labour Bureau on annual basis. As the results of the First Occupational Wage Survey were found to be very useful by the Planning Commission, Labour Bureau conducted Second Occupational Wage Survey during 1963-65, more or less on similar lines, with the same objectives and coverage.

The National Commission on Labour (1969) examined the data collected in previous two rounds of Occupational Wage Survey and recommended the conduct of such type of surveys periodically by Labour Bureau.

Consequently, the Labour Bureau took up the Third Round of Occupational Wage Survey in 1974-79 in 81 industries and Fourth Round in 1985-92 covering 53 industries. The Fifth Round was undertaken in 1993-2001 encompassing all the 53 selected industries covered in the Fourth Round.

The Study Group on Labour Statistics (1999) reviewed the data collected under OWS and recommended for inclusion of Part-Time workers and Apprentices under the survey. In 2002, the Ministry of Labour & Employment constituted the Technical Committee on OWS to revise the OWS schedule and improve the coverage and sampling design of OWS. Accordingly, the sixth round was taken up during 2002 to 2009 covering 56 industries.

The Seventh Round was launched in July 2016 with the survey on Four Mining Industries, more or less on similar lines, with the same objectives and coverage encompassing all the 56 selected industries covered in the Sixth Round (Annexure-I). Under different Sectors, the survey covered 45 Manufacturing, 4 Mining, 3 Plantation and 4 Service Sector Industries. The present report relates to Four Mining Industries, viz.,

- a. Coal Mines,
- b. Iron Ore Mines,
- c. Manganese Mines; and
- d. Oil Mines.

1.2 OBJECTIVES OF THE SURVEY

The main objectives of the survey are:

- a. To obtain data on different components of pay roll earnings for different occupations for scientific studies of inter-industry and intra-industry differentials in earnings in Plantation, Mining, Manufacturing and Service Sector Industries; and
- b. To obtain occupation-wise data on employment, wage rates and dearness allowance for building up weighting diagram for Wage Rate Index Numbers.

On lines of above objectives, the present report on Four Mining Industries has been prepared.

1.3 SELECTION OF INDUSTRIES

The selection of industries for the Seventh Round was based on the following criteria:

- a. That the industry belonged to the organized sector,
- b. That the industry had an importance in the National Economy; and
- c. That the industry had significant share of employment in the organized industrial sector.

Out of 56 industries covered under the 7th round of OWS, 52 industries were selected using the above criteria. On the advice of the Ministry of Labour & Employment, Government of India, four service sector industries viz. a) Electricity Generation & Distribution, b) Railways, c) Public Motor Transport; and d) Ports & Docks, which also formed part of industries in compilation of Consumer Price Index Number for Industrial Workers, released by Labour Bureau, were also included in the 7th round.

1.4 SCOPE AND COVERAGE

The scope of the Occupational Wage Survey for Four Mining Industries extends to all the Mining Industries registered under The Mines Act, 1952.

The frame for the present survey is based on the frame of four Mining Industries maintained by Directorate General of Mines Safety (DGMS), Dhanbad, for Coal as well as Non-Coal Mines.

Occupation-wise wage data were collected only for those workers who conform to the definition of worker defined under the Mines Act, 1952 as described below.

'Worker' means a "A person is said to be employed, in a mine who works under appointment by or with the knowledge of the Manager, whether for wages or not, in any mining operation or in cleaning, oiling and part of any machinery used in or above the mine, or any other kind of work whatsoever incidental to or connected with mining operation". However, detailed definition of 'Worker' in accordance with the different Acts covered under the survey is presented in Annexure-II.

The managerial, technical and clerical staff, though may be covered by the Act as workers, are excluded from the scope of the survey. However, the supervisory personnel, whose duties, besides supervision, generally involve considerable element of manual work, are covered under the survey. Similarly, regular badli and casual workers who have worked continuously for a period of at least one month preceding the reference date have also been covered under the survey. Contract workers working in the premises of the unit are also taken into consideration. As per recommendations of the Study Group on Labour Statistics, part-time workers and apprentices have also been included in the survey. The concept and definitions used during the survey is presented in Annexure-II.

1.5 GEOGRAPHICAL STRATIFICATION

For the purpose of the survey, stratification of each industry was done on the basis of areas of concentration of industry to reflect regional variations. Each area of high concentration, generally a State or a group of States was taken as a separate stratum of the industry. The geographical strata of selected Mining Industries are given below:

Sl. No.	Industry	Stratum
1.	Coal Mines	<ul style="list-style-type: none">1. Jharkhand2. West Bengal3. Telangana4. Chhattisgarh5. Madhya Pradesh6. Maharashtra7. Residual (Odisha, Rajasthan and Gujarat)
2.	Iron Ore Mines	<ul style="list-style-type: none">1. Odisha2. Jharkhand3. Karnataka4. Chhattisgarh5. Goa6. Residual (M.P, A.P and

Sl. No.	Industry	Stratum
		Maharashtra)
3.	Manganese Mines	1. Maharashtra 2. Madhya Pradesh 3. Odisha 4. Karnataka 5. Residual (A.P, Gujarat and Telangana)
4.	Oil Mines	1. Gujarat 2. Assam 3. Residual (A.P, Arunachal Pradesh, U.P, Delhi, Haryana, Jharkhand, Rajasthan, Tripura and W.B)

1.6 SAMPLING DESIGN AND ESTIMATION PROCEDURES

Details of the sample design and the estimation procedure have been presented in Annexure-III. However, the following points merit attention:

- a. A two stage sampling design was adopted. The selection of units was the first stage, whereas, the selection of the workers employed in different occupations in the selected units formed second stage.
- b. The sample was designed in such a way that the permissible error in the average maximum wage rate would be 5 percent with 95 percent confidence interval. For the purpose of statistical exercise, average maximum wage rate was derived as weighted average of maximum wage rate of all the occupations in each of the sample units covered during the Sixth Round. The weights were the number of workers employed in the different occupations in the sample units.
- c. The sample size so determined was allocated in the strata of the industry in proportion of its share of units in the frame.
- d. The frame in each stratum was further divided into two size classes, viz. Upper Size Class and Lower Size Class on the basis of the average daily employment in mines at the national level. While allocating the sample size in the both the size classes in proportion of its frame size within a stratum, it was taken care that at least two units were selected in each size class.
- e. For the purpose of obtaining estimates in respect of the pay roll earnings of workers in each occupation, a predetermined sample of workers (see Para 1.3, Annexure-III) belonging to each category of

sex-age and system of payment of wage was drawn from the selected units.

The sample design and the estimation procedure recommended by the Central Statistical Organisation for Sixth Round of OWS has also been followed for the Seventh Round of OWS.

1.7 SELECTION OF OCCUPATIONS

The list of occupations for the Four Mining Industries was prepared on the basis of pilot survey conducted for the purpose, wherein, two sample units were selected from each industry. On the basis of the list of occupations prepared in Sixth Round, the lists of occupations including job description were updated for the current round of OWS. The occupations, which accounted for the bulk of the workforce in each sampled unit, were listed. The occupations, which did not feature in the list but were listed in the sample units, were clubbed together and designated as the 'Miscellaneous' occupation. The list of occupations along with the job description is presented in Annexure-IV.

1.8 FIELD INVESTIGATION AND REFERENCE PERIOD

The field work for Four Mining Industries was launched during July, 2016 and completed in December, 2016. Requisite details were collected from the sample units relating to reference period. The field staff (regular and Contractual) of the Labour Bureau conducted the fieldwork, which was supervised by the Economic/Statistical Officers by visiting the sample units. Seniors Officers also visited some of the sample units.

The reference date for the collection of data was fixed as 30th June, 2016 for the Mining Industries. Wage period ending on the reference date or a period wherein the reference date falls was taken as the reference period for the collection of data under the survey.

1.9 COLLECTION OF DATA AND SCHEDULE

The data on employment, wage rates, earnings, payment of dearness allowance, etc. was collected from the sample units in the Schedule designed for the survey. Data on employment, wage rates and earnings correspond to all manual workers in specific occupations in each case, while the data on pattern of dearness payment relates to all employees in the unit, as it is not occupation specific. Data on pay roll earnings have been collected only for a sample of workers in each occupation in each sample unit.

The Technical Committee on OWS comprising of the officers of the Labour Bureau, Ministry of Labour & Employment revised the OWS Schedule used in previous rounds. A facsimile of the revised Occupational Wage Survey schedule, used in the current Round, is enclosed at Annexure-V.

1.10 COVERAGE OF UNITS AND SAMPLE SIZE

The coverage of units and the sample size in selected Mining Industries is presented in Table 1.1. A total of 989 units constituted the overall frame for Four Mining Industries. Out of these, 231 units

were selected in the sample, which accounted for 23.36 percent of the total units in the frame. The percentage of units in sample to frame was 5.72 percent in Coal Mines, 39.15 percent in Iron Ore Mines, 58.27 percent in Manganese Mines and 40.00 percent in Oil Mines.

Key findings based on the estimates of various characteristics as per the survey are discussed in Chapters II to IV of this report. Chapter V i.e. the last chapter focuses on (a) Coefficient of Variation of Average Daily Wage Rates and Average Daily Earnings and (b) the estimates of occupation-wise data on average daily employment and average daily wage rates by industry/strata/occupation to provide benchmark data for construction of weighting diagram of the Wage Rate Index Numbers. Detailed statistical tables based on the survey and Annexures are placed after Chapter V.

of Units in the Frame

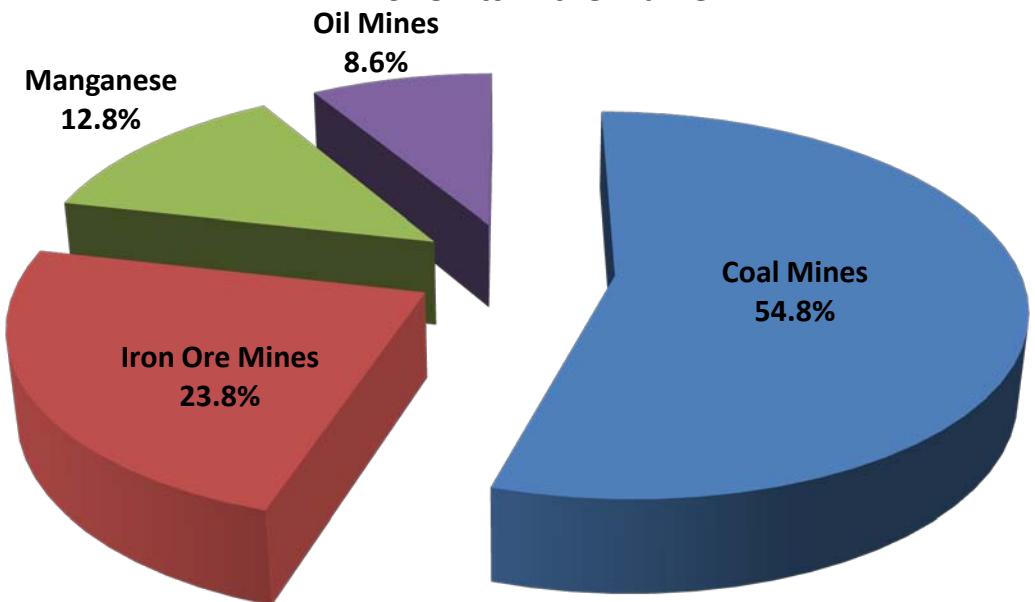

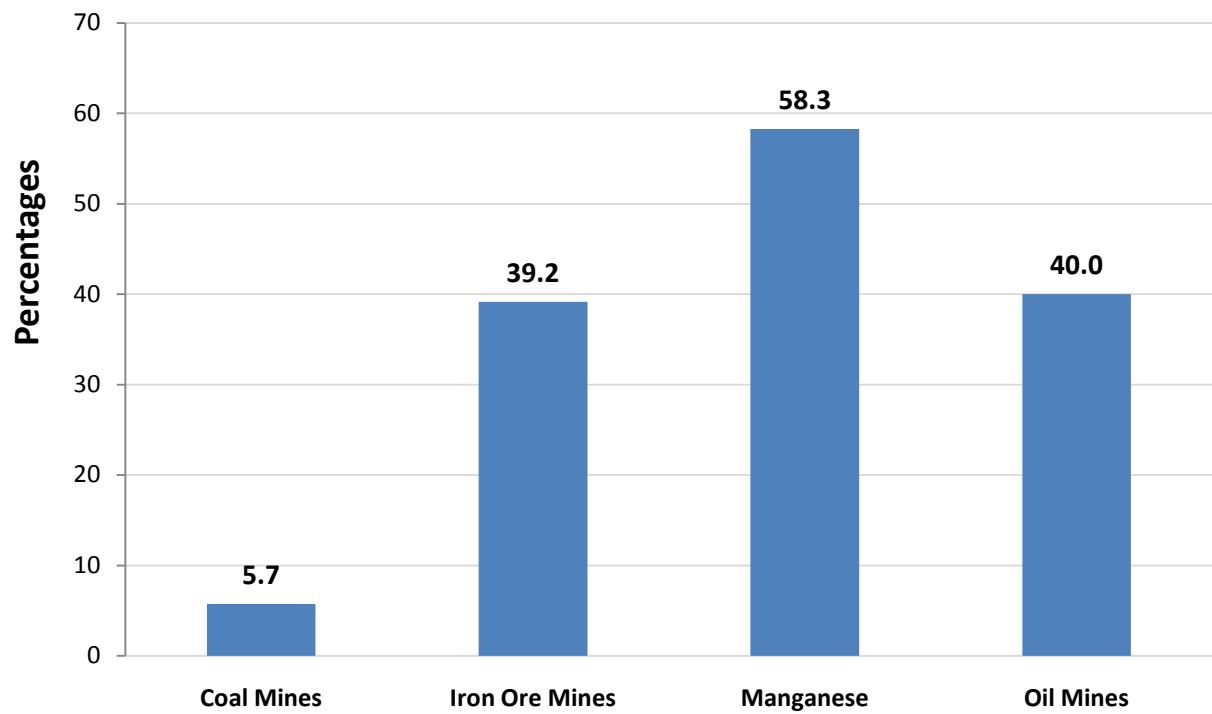

Exhibit 1.2: Percentage of Units in the Sample to the Frame of Four Mining Industries

CHAPTER-II

STRUCTURE OF WORK-FORCE

2.0 INTRODUCTION

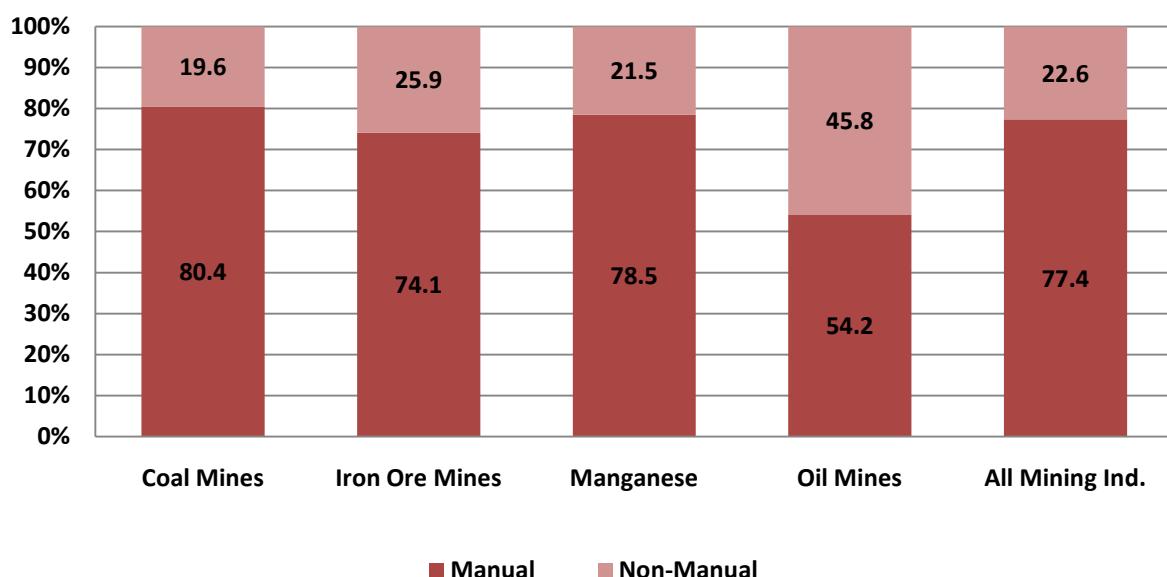

Composition of the work force in an industry varies widely with the nature of its activity, geographical location, operations involved, level of technology available, social and economic conditions of the people and last but, not the least by the Government policies, etc. Variations in these factors account for the change in the composition of the work force not only from one sector to another but also from region to region within the sector. The legislative policies of the Government also influence the composition of working force.

2.1 DISTRIBUTION OF WORKERS

The distribution of workers in selected Mining Industries is presented in Table 2.1. The total number of workers in Four Mining Industries is estimated to be 4,06,060. Out of 4.06 lakh workers employed in the four mining industries, Coal Mines had maximum share (77.54 percent) in the total workforce, followed by Iron Ore Mines (9.64 percent), Manganese Mines (4.05 percent) and Oil Mines (8.77 percent).

Out of the total Workforce, 3,14,426 workers were manual workers, which accounted for 77.43 percent of the total number of workers in the four mining industries. The percentage of manual workers to total number of workers was 80.42 percent in Coal Mines, 74.12 percent in Iron Ore Mines, 78.49 percent in Manganese Mines and 54.19 percent in Oil Mines.

Exhibit 2.1: Distribution of Workers in Four Mining Industries

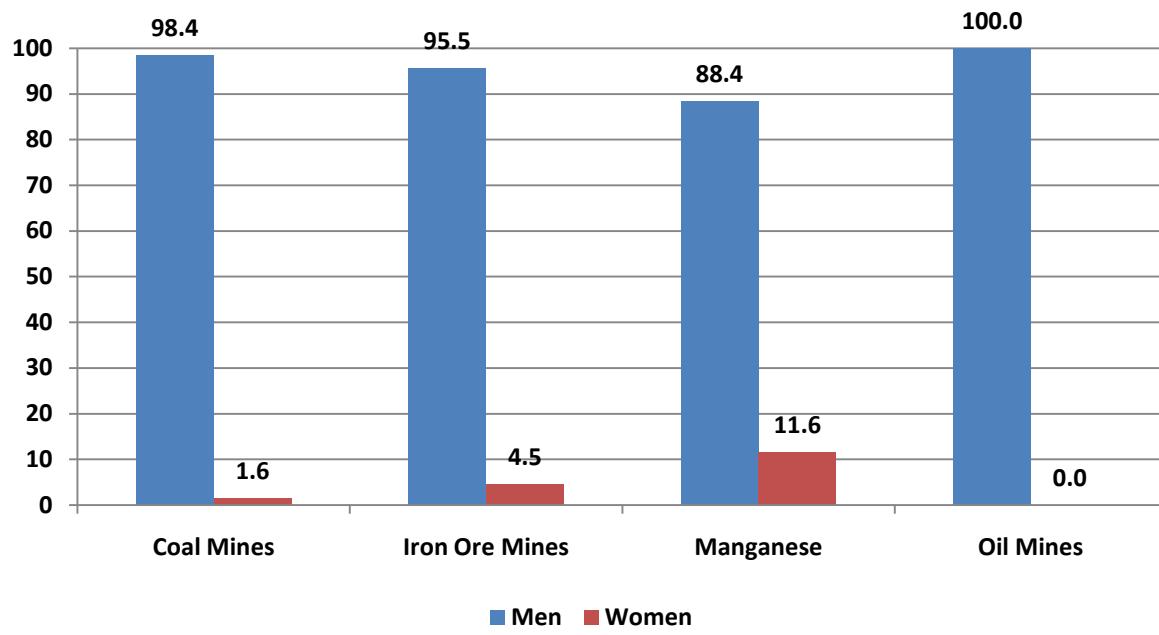

2.2 DISTRIBUTION OF WORK FORCE BY SEXAGE

The composition of work force (manual workers) by sexage⁺ has been presented in Table 2.2. As per the information collected under the survey, the total work force (manual workers) in the four mines industries covered under the survey has been estimated to be about 3.14 lakhs. Out of this total work force (manual workers), a vast majority of workers (henceforth the term 'Worker' would mean manual worker unless otherwise stated) i.e. 80.53 percent were employed in Coal Mines, followed by 9.23 percent in Iron Ore Mines, 6.13 percent in Oil Mines and 4.11 percent in Manganese Mines . Men workers constituted 97.84 percent of the total work force, whereas the remaining 2.16 percent were women. None of the mine industries reported employment of adolescents or children during the survey.

Amongst different mines industries, the highest proportion of men workers i.e. cent percent was in Oil Mines and the lowest i.e. 88.38 percent was reported in Manganese Mines. The proportion of women employment was highest at 11.62 percent in Manganese Mines, followed by 4.46 percent in Iron Ore Mines, 1.58 percent in Coal Mines.

Exhibit 2.2: Percentage Distribution of Workforce by Sexage

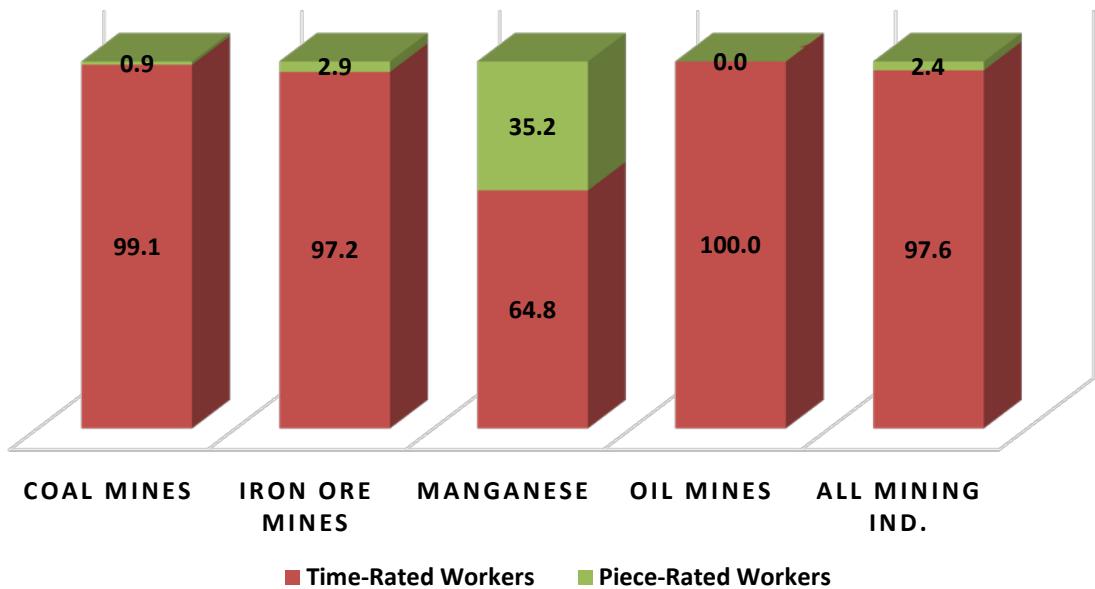

⁺ The term 'Sexage' was used in the survey for identification of Men, Women, Adolescents and Children. Since none of the units in the Mining Industries reported employment of adolescent or child workers hence, Sexage may be treated as 'Gender'.

2.3 DISTRIBUTION OF WORK-FORCE BY SYSTEM OF WAGE PAYMENT

The distribution of workers by system of wage payment is shown in Table 2.3. Taking the entire mines industries as a whole, majority of workers i.e. 97.60 percent were employed by the time-rated system and the remaining 2.40 percent by the piece-rated system. At the mines industries level, the highest proportion of piece-rated workers was reported at 35.20 percent in Manganese Mines, whereas the lowest was at 0.86 percent in Coal Mines. At the Stratum level, the highest proportion of piece-rated workers was reported at 56.47 percent in Madhya Pradesh stratum of Manganese Mines.

Exhibit 2.3: Percentage Distribution of Workforce by System of Payment

2.4 DISTRIBUTION OF TIME-RATED WORKERS BY SEXAGE

The distribution of time-rated workers by sexage is presented in Table 2.4. The Table reveals that a vast majority of time-rated workers were men in all the four mines industries. The corresponding percentages were 98.43 percent in Coal Mines, 96.19 percent in Iron Ore Mines, 91.71 percent in Manganese Mines and cent percent in Oil Mines. The proportion of time-rated women workers was reported highest at 8.29 percent in Manganese Mines, followed by 3.81 percent in Iron Ore Mines, and lowest at 1.57 percent in Coal Mines. At the Stratum level, the highest proportion of time-rated women workers was reported at 23.56 percent in Residual Stratum of Manganese Mines, followed by 14.75 percent in Maharashtra Stratum of Manganese Mines.

2.5 DISTRIBUTION OF PIECE-RATED WORKERS BY SEXAGE

The distribution of piece-rated workers by sexage is shown in Table 2.5. The Table reveals that the piece-rated system was prevalent in three mining industries, except Oil Mines. Among the piece-rated workers, the percentage share of males was 97.51 percent in Coal Mines, 73.19 percent in Iron Ore Mines and 82.23 percent in Manganese Mines. No piece-rated male workers were reported in Oil Mines. Further, it has been reported that all piece-rated workers employed in Jharkhand Stratum of Iron Ore Mines and Jharkhand and Telangana Strata of the Coal Mines were men. At the industries level, the share of women in piece-rated workers was highest at 26.81 percent in Iron Ore Mines, followed by 17.77 percent in Manganese Mines and 2.49 percent in Coal Mines.

Exhibit 2.4: Percentage Distribution of Time Rated Workers by Industry

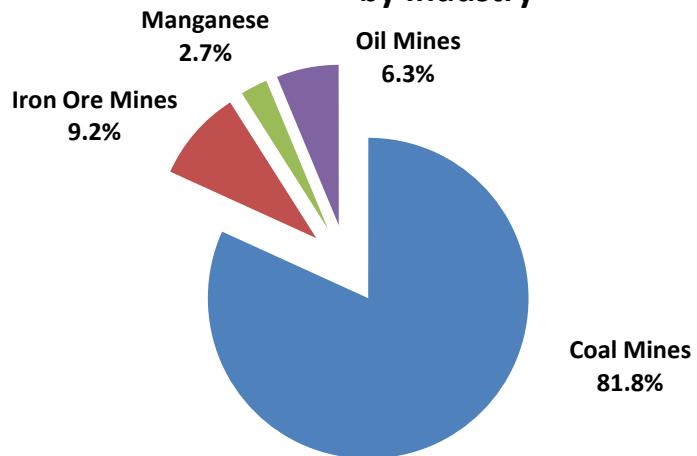

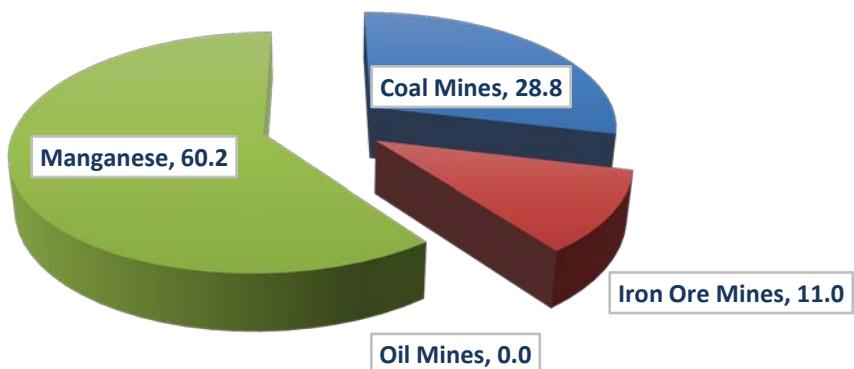

Exhibit 2.5: Percentage Distribution of Piece Rated Workers by Industry

2.6 WORK-FORCE IN MAJOR OCCUPATIONS

The distribution of workers by occupations is shown in Table 2.6. Taking all Mining Industries together, the highest percentage of work force was employed as Coolie/Mazdoor (17.58 percent), followed by Fitter and Trammer/Underground (All Types) with share of 9.21 percent and 6.41 percent, respectively.

The data revealed that in Coal Mines, 17.39 percent of the total workers were Coolie/Mazdoor, followed by Fitter and Trammer/Underground occupations with 11.19 percent and 7.96 percent share of the work force, respectively.

In Iron Ore Mines, Coolie/Mazdoor, HEMM Operator and Helper occupations accounted for 12.46 percent, 9.87 percent and 9.53 percent of the total employment, respectively.

In Manganese Mines, Coolie/Mazdoor occupation reported the highest proportion of workers, i.e. 58.77 percent, followed by the Helper and Miner with 6.95 percent and 5.26 percent of the workers, respectively.

In Oil Mines, Watchman, Production Station Operator and Helper occupations accounted for 32.52 percent, 17.62 percent and 14.41 percent of the total employment, respectively.

Exhibit 2.6(a):Topmost Occupations constituting 50 percent of the total Workforce at All Mining Industries Level

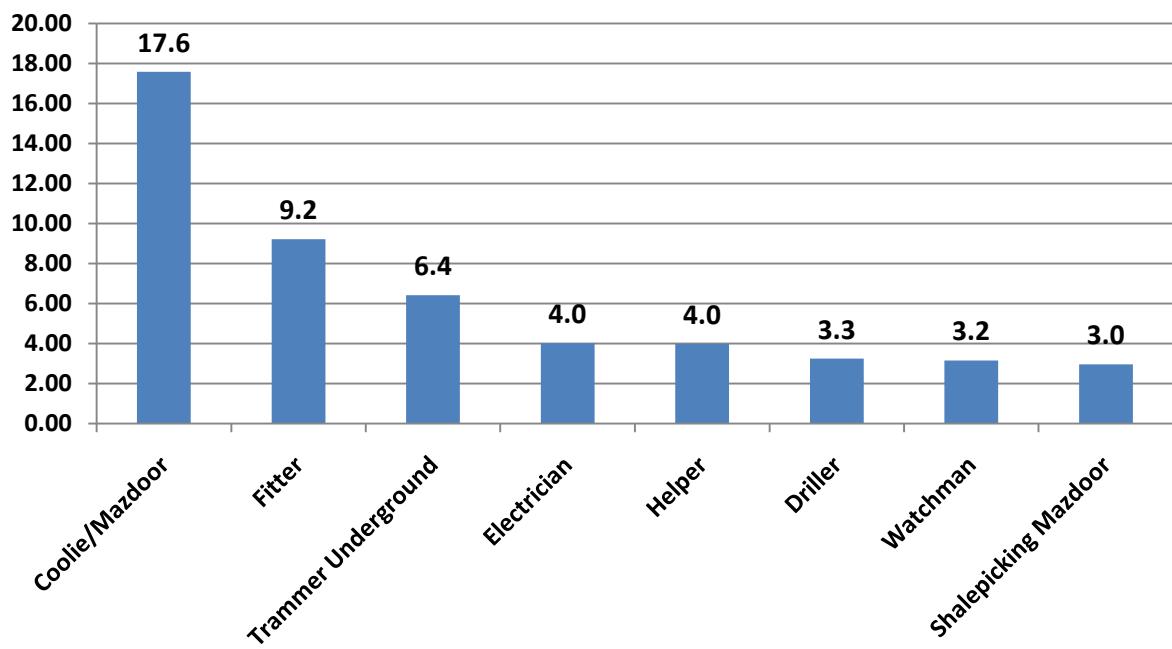

Exhibit 2.6(b): Top/Bottom Occupations in Mining Industries

Serial in order	Coal Mines	Iron Ore Mines	Manganese Mines	Oil Mines
Top Five Occupations (%)				
1	Coolie/ Mazdoor (17.39)	Coolie/ Mazdoor (12.46)	Coolie/ Mazdoor (58.77)	Watchman (32.52)
2	Fitter (11.19)	HEMM Operator (9.87)	Helper (6.95)	Production Station Operator (17.62)
3	Trammer Underground (7.96)	Helper (9.53)	Miner (5.26)	Helper (14.41)
4	Electrician (4.27)	Driver (9.19)	Driver (3.99)	Rig Man/Driller (7.20)
5	Driller (3.90)	Miner (8.84)	Miscellaneous (2.97)	Chemical Attendant/ Tradesman (6.26)
Bottom Five Occupations (%)				
1	Rigger (0.01)	Carpenter (0.01)	Mines Incharge/ Engineer (0.02)	Storekeeper (0.02)
2	Moulder (0.01)	Chainman (0.02)	Oilman/Greaser (0.02)	Plumber (0.03)
3	Stone Cutter (0.02)	Tongsman (0.02)	Dresser (0.03)	Oilman/ Greaser (0.03)
4	Senior Roof Bolter (0.02)	Picker (0.02)	Plumber (0.03)	Crane Operator (0.04)
5	Winder (0.02)	Turner (0.02)	Mason (0.03)	Carpenter (0.04)

2.7 TRENDS IN COMPOSITION OF WORK-FORCE BY SEXAGE AND SYSTEM OF WAGE PAYMENT

The trend in composition of the work-force by sexage and system of wage payment is presented in Table 2.7. As compared with the previous round (2005), the overall employment has recorded an increase in Iron Ore Mines and Manganese Mines, whereas it was reverse in Coal Mines and Oil Mines in the current round. The increase in the proportion of men workers was marked by corresponding decrease in women workers in all the mining industries under study. The proportion of time-rated workers has increased significantly in all the mining industries, in the current round as compared to previous round. The increase in the proportion of

time-rated workers was marked by corresponding decrease in the proportion of piece-rated workers.

Exhibit 2.7: Trend in Composition of Workforce

Industries	Seventh Round (2016)	Sixth Round (2005)	%Growth of Seventh Round Over Sixth Round	%Growth of Sixth Round Over Fifth Round
Coal Mines	2,53,206	4,04,446	(-) 37.39	(-) 29.65
Iron Ore Mines	29,008	27,802	4.34	(-) 42.87
Manganese Mines	12,922	8,271	56.23	(-) 63.16
Oil Mines	19,290	22,856	(-) 15.60	1.68
All Mining Industries	3,14,426	4,63,375	(-) 32.14	(-) 30.69

The total workforce (manual+non-manual) as worked out in OWS (Seventh) Round stands at 4,06,060 in 2016 as compared to DGMS's latest figure of 4,08,520 in 2015. Furthermore, one can also observe declining trend in the workforce of all Mining Industries over the past few years from the DGMS data. Hence, above figure seems to be in tandem with that brought out by DGMS. This may be due to hazardous activity, mechanization of mining sector industries, increased imports particularly in Oil Mine Industry, regulation of coal production, etc.

2.8 PERCENTAGE DISTRIBUTION OF WORK-FORCE IN DIFFERENT OCCUPATIONS AND INDUSTRIES BY SEXAGE

The percentage distribution of workers in different occupations and industries by sexage is given in Table 2.8. In Coal Mines, 98.42 percent workers were men workers and remaining, 1.58 percent was women workers. Out of the total 84 occupations reported in Coal Mines, 19 occupations had employment of women workers. Women workers constituted cent percent of the total employment in Clay Cardidge Maker occupation. Moreover, women workers constituted sizeable proportion of the total employment in Winder (45.45 percent), Miner (41.54 percent), Chemist/Dispensary (38.46 percent), Cook (37.86 percent), Watchman (15.73 percent) and Safety Lamp Checker (10.83 percent) occupations.

In Iron Ore Mines, 95.54 percent workers were men workers and remaining, 4.46 percent were women workers. Out of 52 occupations reported in Iron ore Mines, women workers were employed in 12 occupations. Women workers constituted 51.72 percent and 50.00 percent

of the total employment in the occupations of Screener & Cleaner and Picker, respectively. Besides, women workers constituted considerable proportion of the total employment in Miner (28.44 percent), Sweeper (11.70 percent) and Coolie/Mazdoor (11.12 percent occupations).

In Manganese Mines, 88.38 percent workers were men workers and remaining, 11.62 percent were women workers. Out of 46 occupations reported in Manganese Mines, women workers were employed in 13 occupations. Women workers constituted 42.86 percent and 31.76 percent of the total employment in the occupations of Picker and Miner, respectively. Moreover, Women workers had significant proportion of the total employment in the occupations of Cook (30.77 percent), Ore Washing Operator (30.77 percent), Sweeper (30.23 percent), Screener and Cleaner (26.56 percent), Miscellaneous (20.31 percent), Hammerman (16.67 percent) and Coolie/Mazdoor (13.48 percent).

In Oil Mines, cent percent workers were men workers. Hence, no women workers were reported in Oil Mine Industry.

2.9 PERCENTAGE DISTRIBUTION OF WORKERS IN DIFFERENT OCCUPATIONS BY THE SYSTEM OF WAGE PAYMENT

The percentage distribution of workers in different occupations by system of wage payment is shown in Table 2.9. It is observed that the piece-rated workers were employed in all the mining industries, except in Oil Mines. Piece-rated workers were reported in 5 occupations in Coal Mines, 3 occupations in Iron Ore Mines and 4 occupations in Manganese Mines. Piece-rated system of payment was not reported in Oil Mines. In Coal Mines, highest share of the piece-rated workers were reported in Loader/unloader (74.60 percent) and Miner (41.56 percent). In Iron Ore Mines, piece-rated workers were reported in Screener and Cleaner (25.86 percent). In Manganese Mines, highest share of the piece-rated workers were reported in Coolie/Mazdoor (55.65 percent), Screener and Cleaner (46.87 percent) and Miner (37.94 percent).

CHAPTER-III

WAGE RATES AND DEARNESS ALLOWANCE

3.0 INTRODUCTION

The availability of information on wages and earnings of workers is an important parameter to assess the purchasing power. If the level of employment and under employment is an index of economic distress among the people of working age, the level of wages and earnings of workers serves as an indicator of the economic prosperity of the working population.

Ever since the introduction of planned economy, the living standards of the working population have become dependant, more or less, on levels of earnings. Other types of income are at times, significant but for most of the workers, earnings from paid employment constitute the major source of income. Earnings or take home wages/salaries, which provide means of livelihood tend to conform to the income needed to enable the labour force to maintain its customary standard of living in the long run. If the greater employment means the ability of a large number of persons to satisfy their needs, increased real earnings means greater satisfaction of their wants.

3.1 WAGE RATES

In order to ensure comparability, the term wages has been defined as the sum of basic wage and dearness allowance in respect of workers who receive both these components, while, for other workers the actual consolidated amount of earnings represent wages. The monthly, fortnightly and weekly wages actually paid are divided respectively by the mandays worked (as per ILO Convention) during the reference period to arrive at average daily minimum and maximum wage rates. The simple mean of minimum average daily wage rates and maximum wages rates is average daily wage rates.

3.2 AVERAGE DAILY WAGE RATES BY INDUSTRIES

The details of average daily minimum and maximum wage rates of the workers are given in Table 3.1. At industry level, the average minimum daily wage rates varied between Rs. 513.13 (Iron Ore Mines) and Rs. 1063.24 (Coal Mines) whereas the average maximum daily wage rates varied between Rs. 866.71 (Manganese Mines) and RS. 1613.08 (Coal Mines), respectively. Considering all strata/states, the lowest average daily minimum wage rate of Rs. 295.92 were in Karnataka stratum of Iron Ore Mines and lowest average daily maximum wage rate of Rs. 385.81 was in Residual stratum of Manganese Mines, respectively. Similarly, the highest average daily minimum wage rate of Rs. 1540.51 was found in Chhattisgarh stratum of Coal Mines and the highest average daily maximum wage rate of Rs. 2232.17 was observed in Chhattisgarh stratum of Iron Ore Mines.

The percentage difference in the minimum and maximum wage rates was lowest in Coal Mines (51.71 percent) and highest in Oil Mines (116.39 percent). At the stratum level, it was lowest in Telangana (0.74

percent) under Coal Mines and highest in Gujarat (136.72 percent) under Oil Mines Industry.

Exhibit 3.1: Percentage Difference between Minimum and Maximum Wage Rates

Industries	Average Daily Wage Rates (Mean) (Rs.)	Average Daily Minimum Wage Rates (Rs.)	Average Daily Maximum Wage Rates (Rs.)	Percentage Difference
Coal Mines	1338.16	1063.24	1613.08	51.71
Iron Ore Mines	700.13	513.13	887.13	72.89
Manganese mines	712.92	559.12	866.71	55.01
Oil Mines	1118.35	706.95	1529.75	116.39
All Mining Industries	1240.12	969.91	1510.32	55.72

3.3 AVERAGE DAILY WAGE RATES BY SEXAGE

Average daily wage rates, average daily minimum wage rates and average daily maximum wage rates of workers by sexage are presented in Table 3.2, 3.2(a) and 3.2(b) respectively.

The average daily wage rates of men and women workers for all mining industries combined together were Rs. 1249.32 and Rs. 822.75, respectively. The average daily wage rates for all the workers of all mining industries worked out to be Rs. 1240.12.

Further perusal of Table 3.2 reveals that the average daily wage rate was found to be Rs. 1338.16 in Coal Mines, Rs. 700.13 in Iron Ore Mines, Rs. 712.92 in Manganese Mines, Rs. 1118.35 in Oil Mines.

At the stratum level taking all mining industries together, the highest average daily wage rate was in Chhattisgarh (Rs. 1687.28) for Coal Mines whereas, the lowest average daily wage rate was in Residual stratum (Rs. 359.21) for Manganese Mines.

The Table reveals that average daily wage rates of women workers were less than that of the men workers in all mining industries, except in Oil Mines where, no women workers were reported. Further, at the stratum level also, the average daily wage rate of women workers were higher than their male counterparts in West Bengal, Madhya Pradesh and

Maharashtra strata in Coal Mines and in Madhya Pradesh stratum in Manganese Mines Industry.

Exhibit 3.2: Average Daily Wage Rates by Sexage

Industries	Average Daily Wage Rates (Rs.)		
	Men	Women	Combined
Coal Mines	1343.21	1022.87	1338.16
Iron Ore Mines	713.51	413.88	700.13
Manganese Mines	722.01	643.79	712.92
Oil Mines	1118.35	-	1118.35
All Mining Industries	1249.32	822.75	1240.12

The average daily minimum wage rates for all the mining industries taken together worked out to be Rs. 974.75 for men, Rs. 750.54 for women and Rs. 969.91 for all workers. In Coal Mines, the average daily minimum wage rates were found to be the highest (i.e Rs. 1063.24), followed by Rs. 706.95 in Oil Mines and Rs. 559.12 in Manganese Mines.

The average daily maximum wage rates for all the mining industries taken together worked out to be Rs. 1523.89 for men, Rs. 894.95 for women and Rs. 1510.32 for all workers. In Coal Mines, the average daily maximum wage rates was found to be the highest (i.e Rs. 1613.08), followed by Rs. 1529.75 in Oil Mines, Rs. 887.13 in Iron Ore Mines and Rs. 866.71 in Manganese Mines.

The data reveals that the average daily minimum and maximum wage rates for women workers were found to be lower compared to men workers, except in Manganese Mines, where average daily minimum wage rates of women workers were higher than their men counterparts. These differences may have arisen due to insignificant proportion of women workers which have been used as weight in estimating aggregate results.

Exhibit 3.2(a): Average Daily Minimum Wage Rates (Rs.) by Sexage.

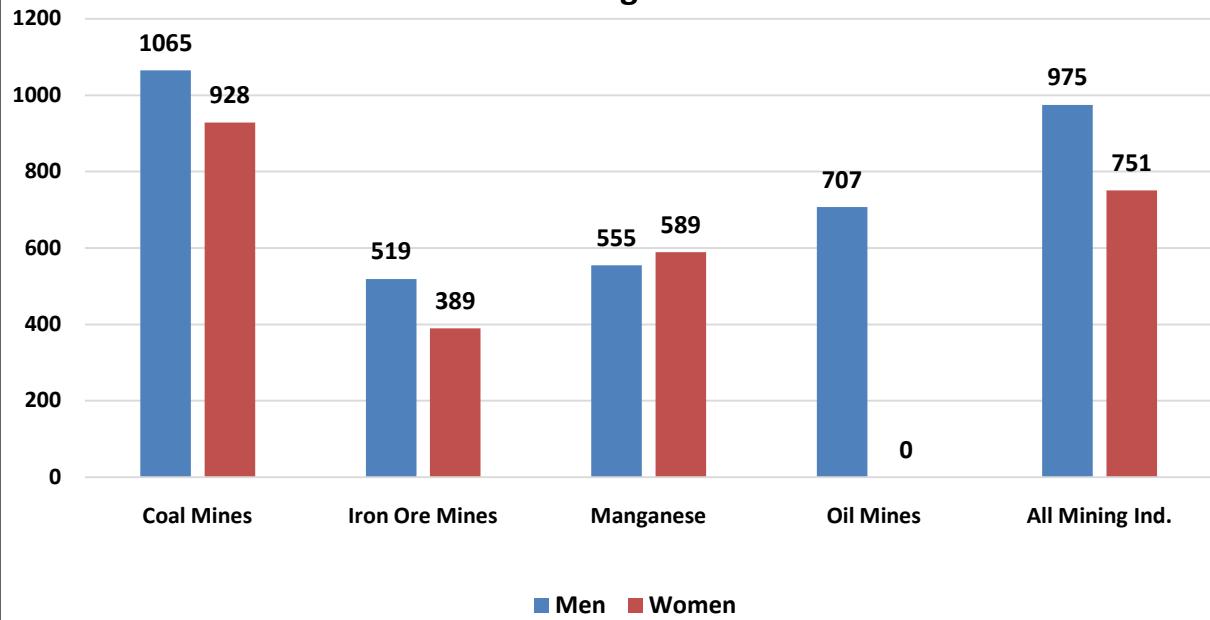

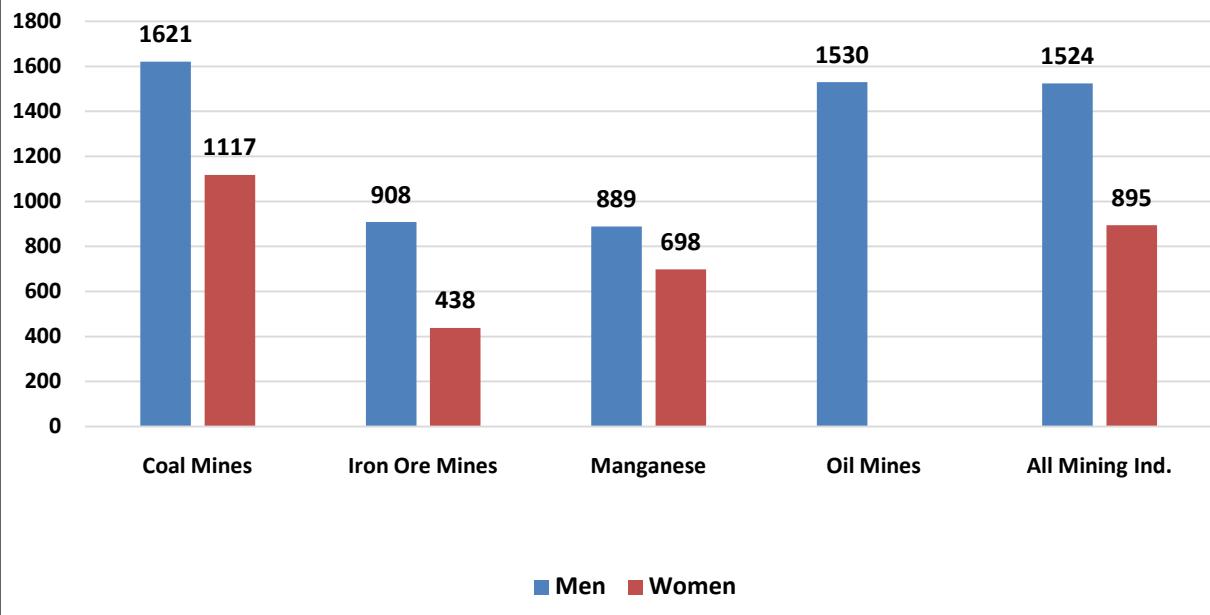

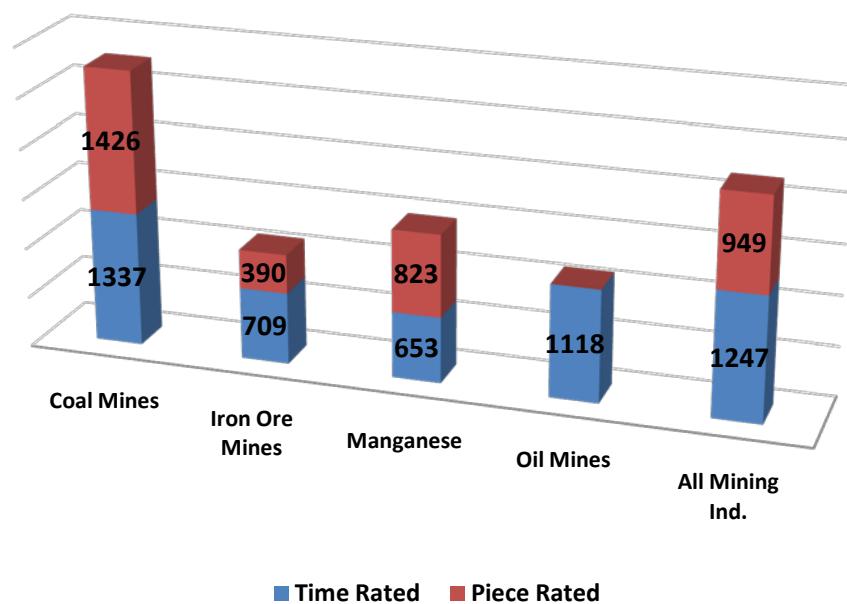

Exhibit 3.2(b): Average Daily Maximum Wage Rates (Rs.) by Sexage.

3.4 AVERAGE DAILY WAGE RATES BY SYSTEM OF PAYMENT

The average daily wage rates of time-rated and piece-rated workers by sexage have been depicted in Tables 3.3 and 3.4 respectively. The average daily wage rates of time-rated and piece-rated workers worked out to be Rs. 1247.28 and Rs. 949.03, respectively, for all the mining industries taken together. Amongst four mining industries, the average daily wage rate of time-rated workers was the highest at Rs. 1337.40 for Coal Mines and the lowest at Rs. 653.11 for Manganese Mines. In case of piece-rated workers, the highest and the lowest average daily wage rates were in Coal Mines (Rs. 1425.70) and Iron Ore mines (Rs. 390.11), respectively. The average daily wage rates of piece-rated workers were more than that of the time-rated workers in Coal Mines and Manganese Mines whereas it was reverse for Iron Ore Mines. No piece-rated system of payment was reported in Oil Mines Industry.

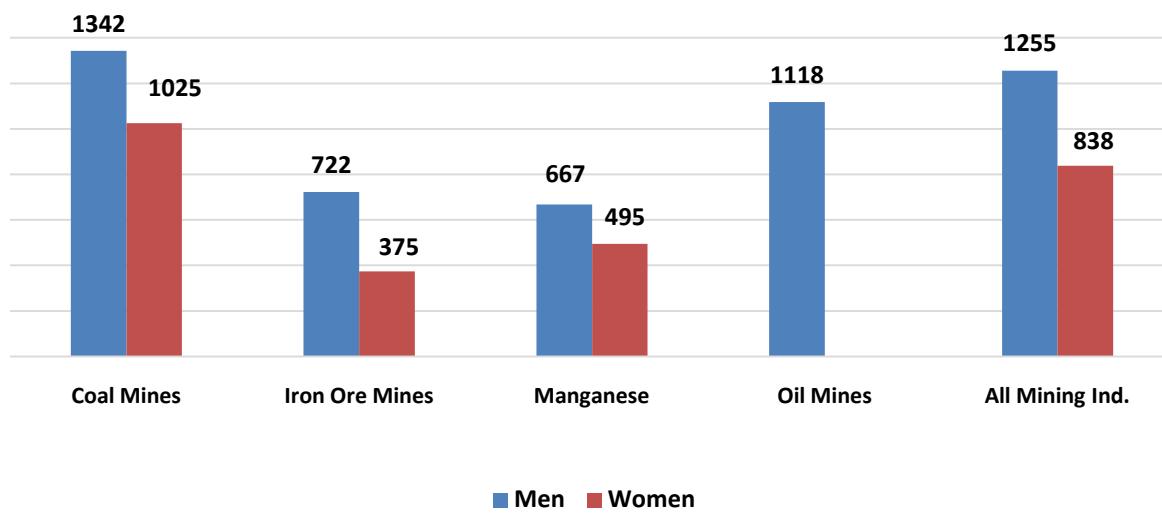

Exhibit 3.3: Average Daily Wage Rates (Rs.) by System of Payment

3.5 AVERAGE DAILY WAGE RATES OF TIME-RATED WORKERS BY SEXAGE

As shown in Table 3.3, the average daily wage rates of time-rated workers exhibit more or less the same trend as observed in case of wage rates of all workers given in Table 3.2. For all mining industries combined, the average daily wage rates for time-rated men, women and all workers were Rs. 1255.03, Rs. 837.95 and Rs. 1247.28, respectively. At mining industries level, the average daily wage rates of time-rated men and women workers were the highest at Rs. 1342.38 and Rs. 1024.89 in Coal Mines , whereas the lowest average daily wage rates for time-rated men and women workers were Rs. 667.44 and Rs. 374.50 in Manganese Mines and Iron Ore Mines, respectively.

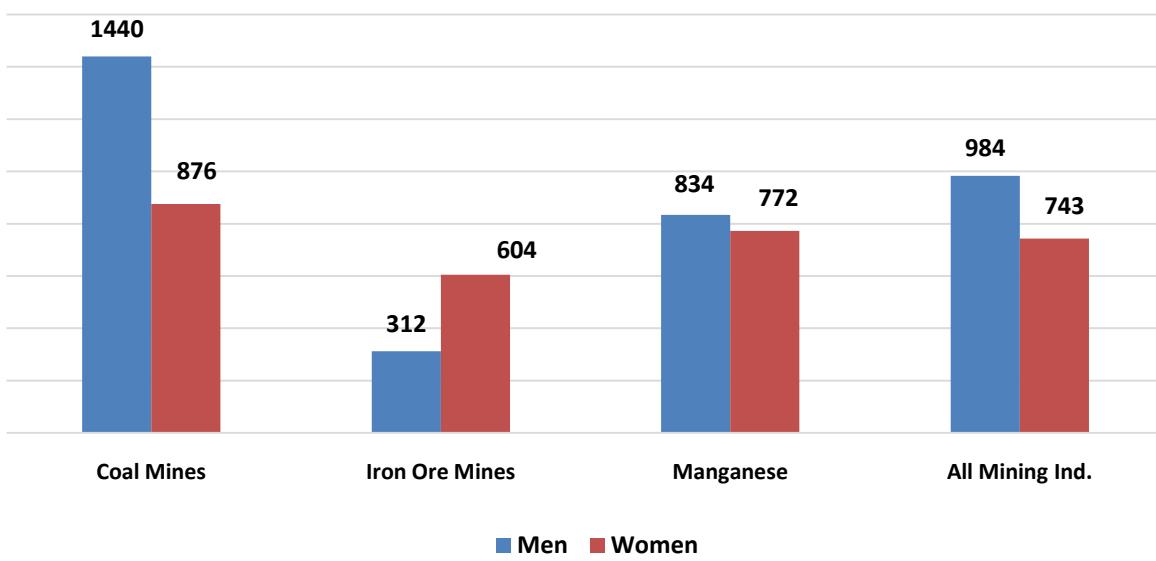

Exhibit 3.4: Average Daily Wage Rates (Rs.) of Time Rated Workers

3.6 AVERAGE DAILY WAGE RATE OF PIECE-RATED WORKERS BY SEXAGE

The average daily wage rate of piece-rated workers by sexage is presented in Table 3.4. For all mining industries combined, the average daily wage rates for piece-rated men, women and all workers were Rs. 983.61, Rs. 742.77 and Rs. 949.03, respectively. The highest average daily wage rates of piece-rated men and women workers at the industry level was Rs. 1439.72 and Rs. 875.66 respectively in Coal Mines, whereas the lowest average daily wage rate of piece-rated men and women workers was Rs. 311.67 and Rs. 604.22 in Iron Ore Mines.

Exhibit 3.5: Average Daily Wage Rates (Rs.) of Piece-Rated Workers

3.7 AVERAGE DAILY WAGE RATES BY OCCUPATION AND SEXAGE

The average daily wage rates by occupation and sexage for all the workers are presented in Table 3.5. Table 3.6 and Table 3.7 show average daily wage rates for time-rated and piece-rated workers, respectively. Table 3.5 shows that there is wide intra-occupation variation in average wage rates in Manganese Mines and Oil Mines, whereas it is comparatively lesser in other mining industries. However, wide inter-industries variation in the average wage rates were reported for common occupations as well as all occupations combined at industry level covered during the survey.

In Coal Mines, the highest and lowest average daily wage rates were reported in Picker (Rs. 2155.76) and Trainees/Apprentices (Rs. 589.10) occupations, respectively. In Iron Ore Mines, the highest and lowest average daily wage rates were reported in Winch Driver (Rs. 2168.13) and Trainees/Apprentices (Rs. 222.64) occupations, respectively. The highest and lowest average daily wage rates in Manganese Mines were reported in Dumper Operator (Rs. 2298.37) and Ore Washing Operator (Rs. 216.63) occupations, respectively. In Oil Mines, the highest and lowest average daily wage rates were reported in Mate/Mukkadam (Rs. 3857.84) and Storekeeper (Rs. 161.00) occupations, respectively.

Out of 84 occupations reported in Coal Mines, women workers were employed in 19 occupations. Out of these 19 occupations, the average daily wage rate of women workers was higher than that of their men counterparts in 7 occupations, v.i.z. Sweeper, Chemist/Dispensary, Clay Cardidge Maker, Dresser, Haulage Khalashi, Safety Lamp Checker and Shalepicking Mazdoor. In Iron Ore Mines, out of 52 occupations, employment of women was reported in 12 occupations, and their average daily wage rate was higher than that of their men counterparts in 5 occupations, v.i.z. Electrician, Helper, Machine Operator/Machinist, Cook and Screener and Cleaner. In Manganese Mines, out of 46 occupations, women workers were employed in 13 occupations and their average daily wage rate was higher than that of their men counterparts in 2 occupations, v.i.z. Coolie/Mazdoor and Mate/Mukaddam. No Women Workers were reported in Oil Mines Industry.

The average daily wage rates of time-rated workers presented in Table 3.6, follows more or less the same pattern as that for the all workers presented in Table 3.5.

Average daily wage rates of piece-rated workers by occupations have been presented in Table 3.7. The piece-rated system of wage payment was prevalent in all mining industries, except Oil Mines.

The occupations employing piece-rated workers were, Loader/Unloader, Haulage Khalashi, Miner, Trammer Underground and Basket/Tub loader in Coal Mines; Coolie/Mazdoor, Miner, Screener & Cleaner in Iron Ore Mines and Coolie/Mazdoor, Hammerman, Miner and Screener & Cleaner in Manganese Mines. Of these occupations, 1 occupation in Coal Mines, 2 occupations in Iron Ore Mines and 3 occupations in Manganese Mines had reported women piece-rated workers.

Average daily wage rates of piece-rated women workers were more than that of their men counterparts in Miner occupation in each of the

mining industries of Coal Mines and Iron Ore Mines and Coolie/Mazdoor and Miner in Manganese Mines Industry.

3.8 TRENDS IN WAGE RATES AND REAL WAGE RATES

The trend in average daily wage rates and real wage rates of workers in the selected Mining Industries has been presented in Table 3.8. The Table reveals that there has been increasing trend in the average daily wage rates of workers in all the Mining Industries during the period from first to seventh round of the survey.

In order to assess the improvement in the economic conditions of the workers, it is necessary to examine the data on real wage rates. The real wage rates for the year y^1 have been worked out with reference to the All India Consumer Price Index Numbers for Industrial Workers by shifting its base to the year $y^0=100$. Symbolically, the Real Wage Rates for the year y^1 with respect to the year y^0 may be defined as:

$$RE^{y^1} = \frac{1960 \text{AICPI}^{y^0}}{1960 \text{AICPI}^{y^1}} \times E^{y^1}$$

where,

- E^{y^1} = Actual wage rate for the year y^1
 RE^{y^1} = Real wage rate for the year y^1
 1960AICPI^{y^0} = All India CPI Number for year y^0 with base 1960=100
 1960AICPI^{y^1} = All India CPI Number for year y^1 with base 1960=100

The real wage rates and percentage increase in real wage rates in the current round (Seventh) with respect to that in the previous round in the mining industries have also been depicted in Table 3.8. It reveals that the real wage rates of the workers have increased during the seventh round in Coal Mines and Manganese Mines industries, whereas Iron Ore Mines and Oil Mines industries have recorded a decline in real wage rates. The highest change in real wage rates during the seventh round (2016) as compared to that in the sixth round (2005) was observed at 99.30 percent in Manganese Mines Industry, followed by 43.72 percent in Coal Mines Industry, (-)8.43 percent in Iron Ore Mines Industry and (-)33.75 percent in Oil Mines Industry.

Exhibit 3.6: Trend in Real Wage Rates in Four Mining Industries

Serial in order	Industries	Seventh Round (Rs.) ⁺ (2016)	Sixth Round (Rs.) ⁺ (2005)	%Change of Seventh Round Over Sixth Round	%Change of Sixth Round Over Fifth Round
1	Coal Mines	21.40	14.89	43.72	69.78
2	Iron Ore Mines	11.19	12.22	(-) 8.43	55.27
3	Manganese Mines	11.40	5.72	99.30	45.92
4	Oil Mines	17.88	26.99	(-) 33.75	182.03

⁺ () = The prices are at 1960 price.

3.9 DEARNESS ALLOWANCE

Dearness Allowance (DA) is paid to the employees to compensate them for the erosion in their wages due to increase in the price level. The system of payment of DA has its own diversity and disparity in the pattern of payment of remuneration to employees. It not only differs from industry to industry but also within the same industry. A fairly large number of industrial establishments in the country pay a separate allowance known as the dearness allowance to supplement the wages of their employees. It includes any payment made to protect the employees against the inflation and rising prices, such as, dearness allowance (DA), variable dearness allowance (VDA), interim relief, dearness pay, etc. Since the payment of dearness allowance is not occupation specific, therefore, the information collected during the survey covered all the employees in the sample units.

3.10 EXTENT OF DEARNESS ALLOWANCE PAYMENT

Industry-wise and stratum-wise, number of units paying DA as a separate component of wages/salaries is given in Table 3.9. For all mining industries taken together, 73.91 percent of units covered in the survey were paying dearness allowance as a separate component of wages/salaries. Among different mining industries, 92.99 percent units in Coal Mines, 42.13 percent units in Iron Ore Mines, 55.12 percent units in Manganese Mines and 68.24 percent in Oil Mines were paying dearness allowance to their employees.

Out of the total units paying dearness allowance to their employees, 90.74 percent units were reported to be using CPI numbers

brought out by Labour Bureau for payment of DA, whereas, 1.77 percent of the units were using CPI series brought out by State Governments and remaining 7.49 percent units were paying dearness allowance without using any CPI series. At the stratum level, all the units paying dearness allowance in Jharkhand, West Bengal, Telangana, Chhattisgarh, Madhya Pradesh and Residual Strata of Coal Mines, Jharkhand and Chhattisgarh Strata of Iron Ore Mines, Madhya Pradesh and Odisha Strata of Manganese Mines and Gujarat, Assam and Residual strata of Oil Mines were using CPI number brought out by Labour Bureau.

Of the units using Labour Bureau CPI Numbers for payment of dearness allowance to their employees, 96.85 percent units were using CPI Numbers for Industrial workers (2001=100), 0.15 percent units were using CPI Numbers for Industrial workers (1982=100) and remaining, 3.00 percent were using CPI-IW (Other Base).

While analyzing data on the percentage use of Labour Bureau Consumer Price Index Centres, it is observed that cent percent units were using All India Consumer Price Index Numbers (AICPI).

3.11 EXTENT OF EMPLOYEES RECEIVING DEARNESS ALLOWANCE

Table 3.10 reveals that 96.14 percent employees in Coal Mines, 52.27 percent employees in Iron Ore Mines, 79.28 percent employees in Manganese Mines and 76.17 percent in Oil Mines were getting dearness allowance. The lowest percentage of employees receiving dearness allowance i.e. 20.63 percent was in Residual stratum of Iron Ore Mines. Taking entire four mining industries as a whole, 89.48 percent of employees were receiving dearness allowance. Out of all the units paying dearness allowance in the mining industries, 94.58 percent of employees were receiving dearness allowance.

3.12 PERCENTAGE DISTRIBUTION OF UNITS PAYING DA BY CRITERION FOR PAYMENT OF DA

A number of methods and procedures are adopted by industrial units for compilation and payment of dearness allowance to its employees. The method followed by units are either according to changes in Consumer Price Index Numbers or linked to pay scales/slabs or paid at a flat rate or combination of all these systems. Distribution of units paying dearness allowance by system of payment is presented in Table 3.11.

Among the units paying DA (i.e. 73.91 percent of the total number of units), a vast majority (about 81.61 percent) units were paying DA on CPI numbers, followed by 8.58 percent units were paying DA on flat rates, 6.13 percent units were paying DA on other methods/combination system and 3.68 percent units were paying DA on pay scale/slab system.

Exhibit 3.7: Percentage Units Paying DA & Employees Receiving DA in Mining Industry

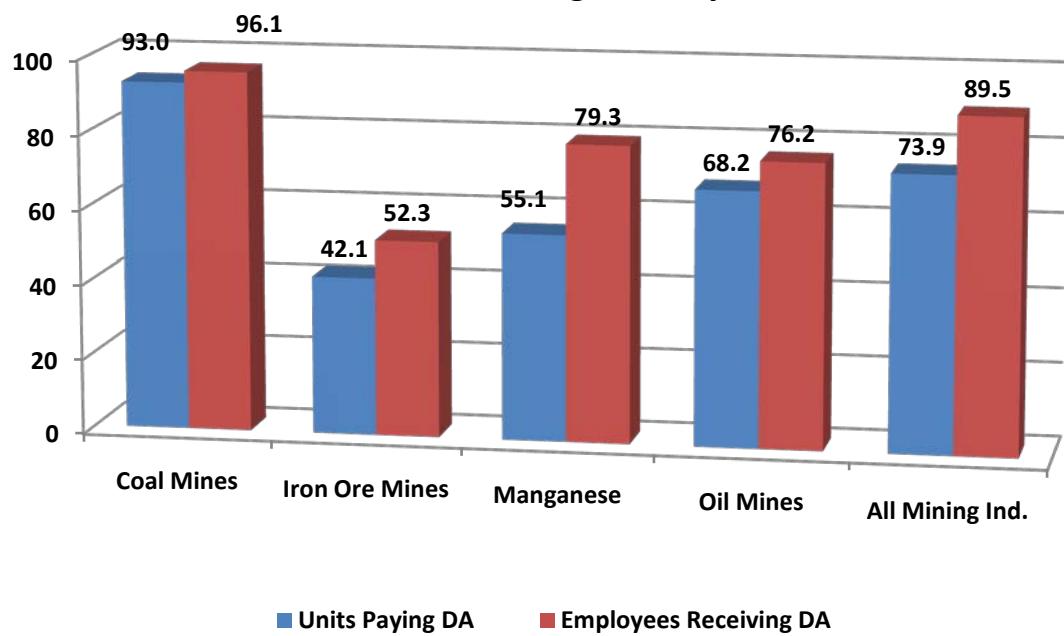

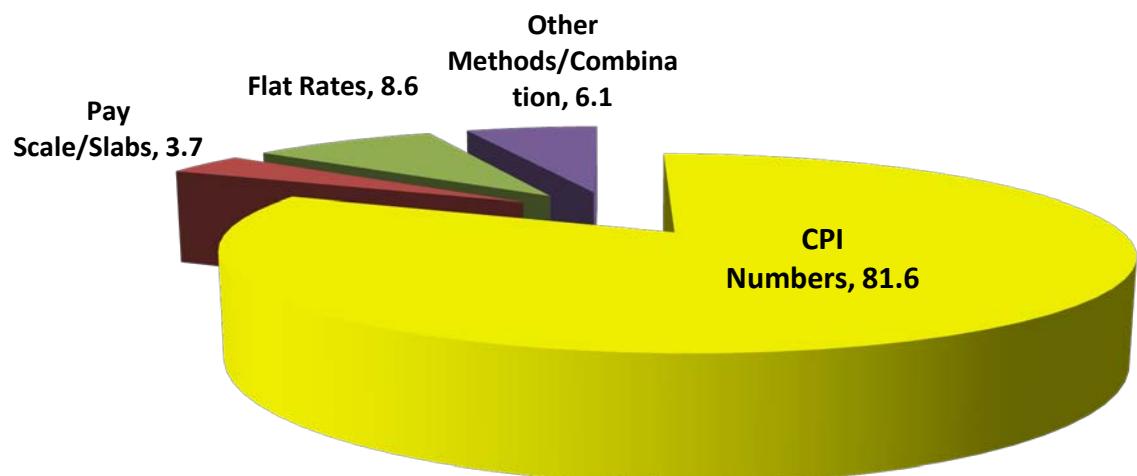

Exhibit 3.8: Percentage Units Paying DA by System of Payment

CHAPTER-IV

PAYROLL EARNINGS

4.0 INTRODUCTION

Payroll earnings of workers in different occupations in an industry/region reflect the inter-industry and intra-industry differentials in income and socio-economic conditions of the workers. Data on earnings from payrolls of establishments refer to cash payments received by the workers from the employers. It includes remuneration paid to workers regularly in every wage period for normal working hours, overtime payment, bonus (production, incentive, attendance, etc.), dearness allowance, remuneration for time not worked (public holidays, sick leave and other paid leave), other cash allowances of a regular nature, and regular payments made in kind. Payments of irregular nature, such as, profit sharing bonus, ex-gratia payment, etc. are excluded from the scope of data on earnings. Similarly, payments made towards free housing, ex-gratia payments like gratuity, lay-off compensation, etc. are also excluded from the scope of earnings. The requisite information collected during the course of survey from a sample of workers drawn from each selected occupation in four selected mining industries is analyzed in succeeding paragraphs.

The information on average daily earnings, presented in this Chapter and elsewhere in the Report, relates to wages/earnings per manday paid for. For arriving at the figure of average daily earnings, the total payroll earnings in a pay period is divided by the total number of days paid for during the period i.e. the total number of days worked plus the number of days not worked but paid for.

4.1 AVERAGE DAILY EARNINGS BY SEXAGE

Average daily earnings of workers by sex have been presented in Table 4.1. The overall average daily earnings of men, women and all workers in the Four Mines Industries worked out to Rs. 1419.95, Rs. 1049.10 and Rs. 1411.94, respectively.

The earnings of women workers were less than that of their men counterparts in all the mining industries, except in Oil Mines where no women worker was reported. However, at the stratum level, the average daily earnings of women workers were higher than their men counterparts in the West Bengal Stratum of Coal Mines and Madhya Pradesh Stratum of Manganese Mines.

The average daily earnings of men workers were the highest at Rs. 1515.11 in Coal Mines, followed by Rs. 1470.81 in Oil Mines. Similarly, the average daily earnings of women workers was highest at Rs. 1404.72 in Coal Mines, followed by Rs. 685.18 in Manganese Mines Industry, whereas the lowest average daily earnings of women workers at Rs. 375.78 was in Iron Ore Mines.

Exhibit 4.1: Average Daily Earnings by Sexage

Industries	Average Daily Earnings (Rs.)		
	Men	Women	Combined
Coal Mines	1515.11	1404.72	1513.37
Iron Ore Mines	792.71	375.78	774.09
Manganese Mines	779.51	685.18	768.55
Oil Mines	1470.81	-	1470.81
All Mines Industries	1419.95	1049.10	1411.94

4.2 AVERAGE DAILY EARNINGS OF TIME-RATED WORKERS BY SEXAGE

Average daily earnings of time-rated workers by sex have been presented in Table 4.2. The average daily earnings of time-rated men, women and all workers were observed at Rs. 1426.89, Rs. 1103.54 and Rs. 1420.88, respectively. Further, in time-rated category, average daily earnings of men workers were higher than that of their women counterparts in all the mining industries. The highest average daily earnings of time-rated men and women workers were reported in Coal Mines at the rate of Rs. 1516.26 and Rs. 1409.90, respectively. The lowest average daily earnings of time-rated men and women workers were observed at the rate of Rs. 652.14 in Manganese Mines and Rs. 376.30 in Iron Ore Mines, respectively.

4.3 AVERAGE DAILY EARNINGS OF PIECE-RATED WORKERS BY SEXAGE

Sex-wise information on average daily earnings of piece-rated workers is given in Table 4.3. The average daily earnings of piece-rated men, women and all workers was found to be Rs. 1096.61, Rs. 762.72 and Rs. 1048.66, respectively. The highest average daily earnings of piece-rated men and women workers were observed at the rate of Rs. 1381.26 and Rs. 1027.20 in Coal Mines, respectively and the lowest at the rate of Rs. 444.14 and Rs. 373.24 in Iron Ore Mines, respectively.

Exhibit 4.2: Average Daily Earnings (Rs.) of Time Rated Workers

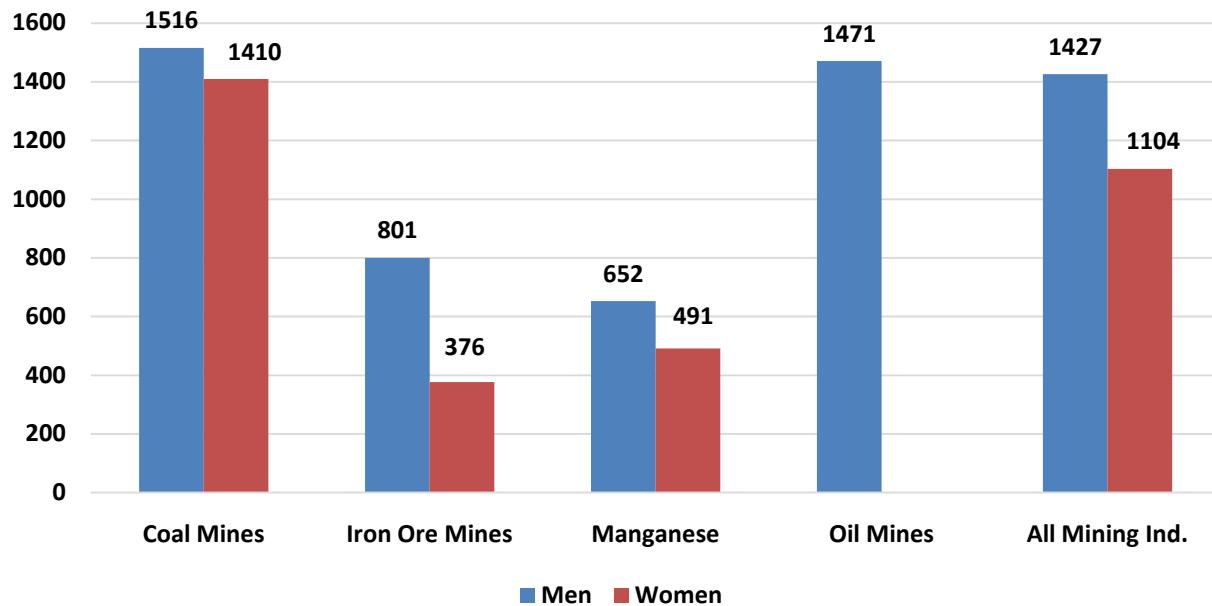

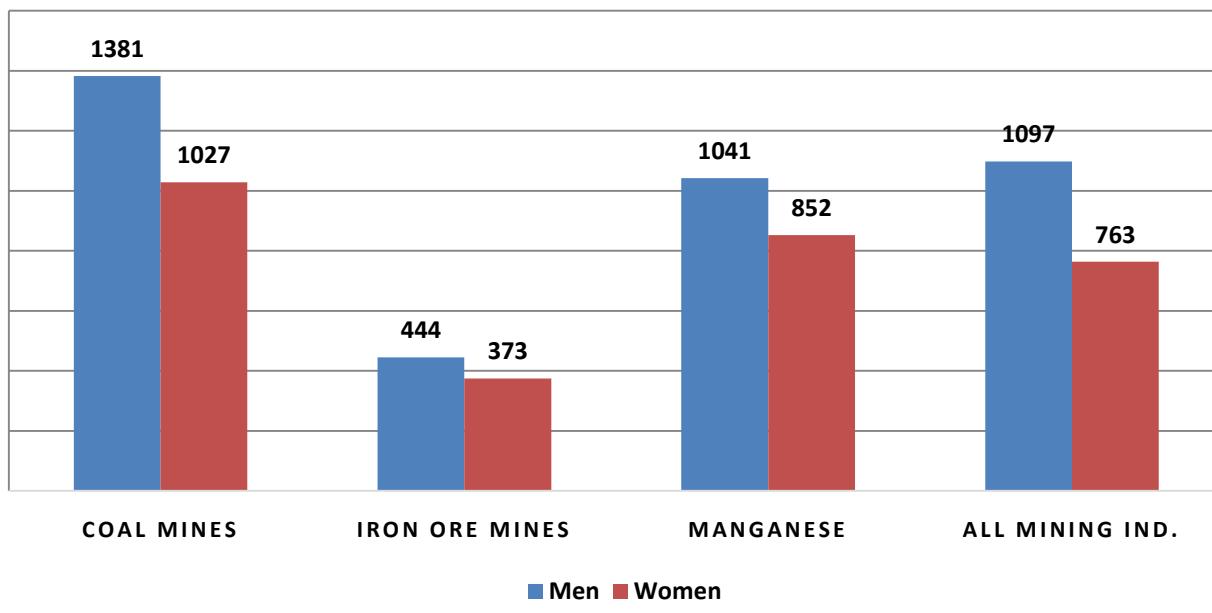

Exhibit 4.3: Average Daily Earnings (Rs.) of Piece Rated Workers

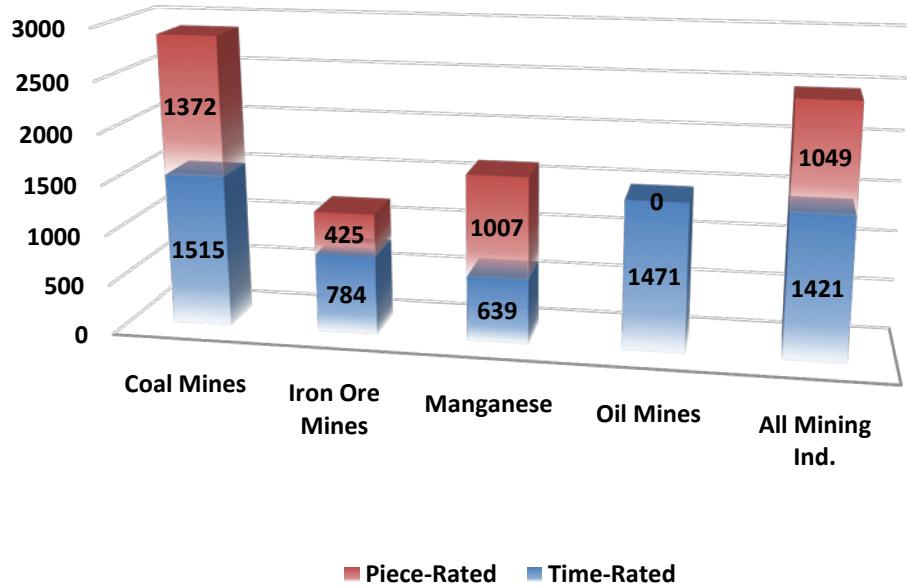

4.4 AVERAGE DAILY EARNINGS BY SYSTEM OF WAGE PAYMENT

The average daily earnings of workers by system of wage payment are given in Table 4.4. For all mining industries taken together, the average daily earnings of time-rated workers (Rs. 1420.88) were higher than that of the piece-rated workers (Rs. 1048.66). At the industry level, the average daily earnings of piece-rated workers was more than

that of their time-rated counterparts in Manganese Mines, whereas it was opposite in remaining mining industries. The highest average daily earnings of the time-rated workers was observed at Rs. 1514.59 in Coal Mines, followed by Rs. 1470.81 in Oil Mines, whereas the lowest average daily earnings of Rs. 638.78 was found in Manganese Mines.

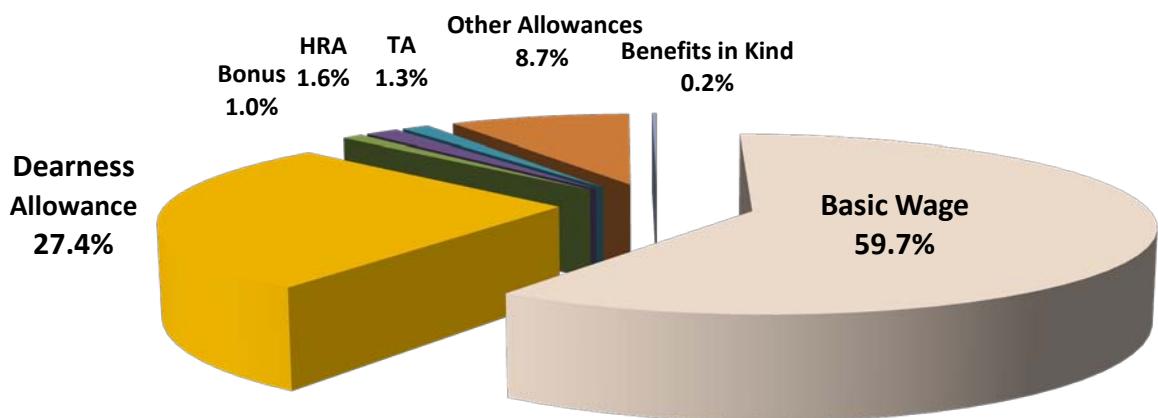

Exhibit 4.4: Average Daily Earnings (Rs.) by System of Payment

4.5 AVERAGE DAILY EARNINGS BY COMPONENTS

The average daily earnings by components are presented in Table 4.5. It may be seen from the Table that the basic wage and dearness allowance were the two main components of worker's earnings. Both these components taken together accounted for 87.12 percent of total average daily earnings for all the four mining industries taken together. The other components of earnings in order of their percentage share in the total average daily earnings were other allowances (8.70 percent), house rent allowances (1.61 percent), travelling allowances (1.33 percent), bonus (1.01 percent) and benefits-in-kind (0.22 percent).

Exhibit 4.5: Share of Different Components in Average Daily Earnings

4.6 DISTRIBUTION OF WORKERS BY LEVELS OF AVERAGE DAILY EARNINGS

The distribution of workers by different groups of average daily earnings is shown in Table 4.6. The average daily earnings of 42.65 percent of workers were in the range of Rs. 1500.01 to Rs. 2000.00 per day, followed by 22.87 percent workers between Rs. 1000.01 to Rs. 1500.00 per day.

The percentage workers receiving the average daily earnings in the range of Rs. 1500.01 to Rs. 2000.00 per day were 51.08 percent in Coal Mines, 12.87 percent in Iron Ore Mines, 1.22 percent in Manganese Mines and 4.50 percent in Oil Mines.

At stratum level, 84.88 percent workers in Chhattisgarh stratum of Iron Ore Mines and 68.12 percent in Madhya Pradesh stratum of Coal Mines earned in the range of Rs. 1500.01 to Rs. 2000.00 per day.

4.7 DISTRIBUTION OF WORKERS AND TOTAL WAGE BILL BY OCCUPATION

The percentage of workers in each occupation and the percentage of total wage bill accrued to them have been presented in Table 4.7. It is observed that in each Mining Industry, there were only few occupations, which employed majority of workers in that particular industry and accounted for the major portion of the wage bill in the industry.

In Coal Mines, five occupations viz., Coolie/Mazdoor, Driller, Electrician, Fitter and Trammer Underground accounted for 44.71 percent of the employment and 42.61 percent of the wage bill as well.

In Iron Ore Mines, six occupations viz., Coolie/Mazdoor, Driver, Helper, Mechanic (Gen), Supervisor and HEMM Operator accounted for 54.88 percent of the employment and 53.35 percent of the wage bill in the industry.

In Manganese Mines, four occupations viz., Coolie/Mazdoor, Driver, Helper and Miner accounted for 74.97 percent of the employment and 74.38 percent of the wage bill in the industry.

In Oil Mines, five occupations viz., Helper, Watchman, Chemical Attendant/Tradesman, Production Station Operator and Rig Man/Driller, accounted for 78.01 percent and 66.47 percent of the wage bill in the industry.

4.8 AVERAGE DAILY EARNINGS OF WORKERS BY OCCUPATION AND SEXAGE

Average daily earnings of workers by occupation and sex have been presented in Table 4.8. The highest average daily earnings in different occupations were observed for Checker (Rs. 3934.13) in Coal Mines; Chargehand (Rs. 2203.35) in Iron Ore Mines; Dumper Operator (Rs. 2278.17) in Manganese Mines and Mate/Mukaddam (Rs. 4628.20) in Oil Mines Industry.

On the other hand, the lowest average daily earnings were observed for Trainees/Apprentices (Rs. 396.26) in Coal Mines; Hammerman (Rs. 267.80) in Iron Ore Mines; Grinder (Rs. 299.73) in Manganese Mines and Plumber (Rs. 261.00) in Oil Mines Industry.

Out of 84 occupations reported in Coal Mines, women workers were employed in 19 occupations and their earnings were more than their men counterparts in 9 occupations, viz., Coolie/Mazdoor, Electrician, Helper, Sweeper, Clay Cardidge Maker, Dresser, Haulage Operator, Safety Lamp Checker and shalepicking Mazdoor.

Out of 52 occupations in Iron Ore Mines, women were reported in 12 occupations and their earnings were more than their men counterparts in 3 occupations, viz., Helper, Machine Operator/Machinist and Screener & Cleaner.

Out of 46 occupations reported in Manganese Mines, women were employed in 13 occupations and their earnings were more than their men counterparts in 3 occupations, viz. Coolie/Mazdoor, Helper and Mate/Mukaddam.

4.9 AVERAGE DAILY EARNINGS BY OCCUPATIONS, SEXAGE AND SYSTEM OF PAYMENT

Average daily earnings of workers by occupations, sex and system of payment have been presented in Tables 4.9, 4.10 and 4.11, respectively. Table 4.11 shows that the average daily earnings of piece-rated workers for all mining industries taken together were lower than the earnings of time-rated workers. The average daily earnings of piece-rated workers were less than time-rated workers in two mining industries, except in Manganese Mines.

An analysis of data presented in Table 4.9, revealed that at occupation level, the average daily earnings of time-rated women workers were higher than that of their men counterparts in 9 occupations, viz. Coolie/Mazdoor, Electrician, Helper, Sweeper, Clay Cardidge Maker, Dresser, Haulage Khalashi, Safety Lamp Checker and Shalepicking Mazdoor in Coal Mines; in 3 occupations, viz. Helper, Machine Operator/Machinist and Screener and Cleaner in Iron Ore Mines and in 3 occupations, viz. Coolie/Mazdoor, Helper and Mate/Mukaddam in Manganese Mines.

The average daily earnings of piece-rated workers by occupation and sex have been presented in Table 4.10. The average daily earnings of piece-rated women workers were less than men workers in all mines for all occupations combined together. Moreover, the earnings of piece-rated women workers were more than that of their men counterparts in occupations, Miner of Coal Mines; Miner of Iron Ore Mines and Miner of Manganese Mines.

4.10 AVERAGE DAILY EARNINGS BY OCCUPATIONS AND COMPONENTS OF EARNINGS

The average daily earnings of workers by components in each occupation are depicted in Table 4.12. It is observed that in all the occupations as well as at industry level, the basic wage and dearness allowance were the major components of the average daily earnings. Among other components of earning, other allowance and house rent allowance were paid in most of the occupations in all the mining industries with other allowances forming a substantial portion of the earnings. Bonus was being paid to various occupations in all the mining industries. Benefits-in-kind was also paid in most of the occupations of all the mining industries.

4.11 TREND IN AVERAGE DAILY EARNINGS AND REAL EARNINGS OF WORKERS

The trend in average daily earnings of workers by sexage and system of wage payment over different rounds has been presented in Table 4.13. It is seen that the average daily earnings have registered an increase in all Four Mining Industries in the current round (2016) as compared with the previous round (2005).

In order to assess the improvement in the economic conditions of the workers, it is necessary to examine the data on real earnings. The real earnings for the workers have also been presented in the Table 4.13. The real earnings have been defined on the same line as the real wage rate defined in Chapter-III.

The Table shows the extent of increase in real earnings of workers in the year 2016 as compared to that in the year 2005. The Table reveals that the real earnings of the workers have increased in Coal Mines, Iron Ore Mines and Manganese Mines Industries covered during 7th round of Occupational Wage Survey. However, real earnings decreased in Oil Mines Industry. The highest change in real earnings has been observed at 94.46 percent in Manganese Mines, followed by 45.17 percent in Coal Mines, 8.60 percent in Iron Ore Mines and (-)19.86 percent in Oil Mines.

Exhibit 4.6: Trend in Real Earnings (Rs.) in Mining Industries

Serial in order	Industries	Seventh Round (Rs.) ⁺ (2016)	Sixth Round (Rs.) ⁺ (2005)	%Change of Seventh Round Over Sixth Round	%Change of Sixth Round Over Fifth Round
1	Coal Mines	24.20	16.67	45.17	50.04
2	Iron Ore Mines	12.38	11.40	8.60	41.09
3	Manganese Mines	12.29	6.32	94.46	42.34
4	Oil Mines	23.52	29.35	(-) 19.86	140.38

⁺

CHAPTER-V SPECIAL TABLES

5.1 COEFFICIENT OF VARIATION FOR WAGE RATES

The coefficient of variation is a measure of relative dispersion and defined as:

$$\text{Coefficient of Variation (CV)} = \frac{\text{Standard Deviation}}{\text{Mean}} \times 100$$

It is generally expressed in terms of percentage. The use of Coefficient of Variation is important due to the fact that the Mean and Standard Deviation tend to change together in many experiments. Also the Standard Deviation is not a very helpful measure of dispersion when studied alone for any distribution, in general. Hence, knowledge of relative variation i.e. coefficient of variation is valuable in evaluating the consistency of various parameters estimated in a survey.

The coefficient of variation of average daily maximum wage rates, average daily minimum wage rates and average daily mean wage rates have been presented in Table 5.1.

The coefficient of variation in average daily mean wage rates at industry level was observed to be 41.77 percent. The coefficient of variation in average daily minimum wage rates and average daily maximum wage rates were found to be 45.26 percent and 43.62 percent respectively.

From Table 5.1, at Industry level, the maximum coefficient of variation in average daily wage rates was observed at 58.98 percent in Manganese Mines, followed by Iron Ore Mines at 52.77 percent. The lowest coefficient of variation was observed in Oil Mines at 28.71 percent.

It may also, be seen from Table 5.1 that in average daily mean wage rates at Stratum level, the highest coefficient of variation at 84.00 percent was observed in Residual stratum of Manganese Mines, followed by 71.79 percent in Chhattisgarh stratum of Iron Ore Mines. The minimum coefficient of variation was 4.28 percent in Karnataka stratum of Iron Ore Mines.

5.2 COEFFICIENT OF VARIATION IN AVERAGE DAILY EARNINGS BY OCCUPATIONS AND BETWEEN STRATA

For comparing the variations in the average earnings at industry, stratum and occupation level, the coefficient of variation in average daily earnings for all the strata and occupations in different

industries were worked out. These have been presented in the Tables 5.2 and 5.3, respectively. The coefficient of variation for average daily earnings for some of the occupations could not be worked out because of the reason that only one worker was found employed in these occupations in a textile. The parameter for such occupations has been indicated by putting a dash (-) against these occupations.

It may be seen from Table 5.2 that at Industry level, the maximum coefficient of variation in average daily wage earnings was observed at 78.95 percent in Oil Mines, followed by Manganese Mines at 68.50 percent. The lowest coefficient of variation was found in Coal Mines at 27.32 percent. At stratum level, among the mining industries, the highest coefficient of variation at 104.44 percent was observed in Gujarat stratum of Oil Mines, followed by 82.42 percent in Residual stratum of Manganese Mines. The minimum coefficient of variation was 15.26 percent in Chhattisgarh stratum of Coal Mines.

Occupation-wise coefficient of variation in each industry has been presented in Table 5.3. The highest and lowest coefficient of variation in Coal Mines was observed in Gen/Turbo Operator (99.06 percent) and Banksman (1.19 percent) occupations, respectively. In Iron Ore Mines, the highest and lowest coefficient of variation was found in Mason (119.75 percent) and Hammerman (4.44 percent) occupations, respectively. The highest and lowest coefficient of variation in Manganese Mines was observed in Miner (99.33 percent) and Engine Room Attendant/Operator (0.04 percent) occupations, respectively. The highest and lowest coefficient of variation in Oil Mines was found in Machinist/Boring Operator (122.15 percent) and Engine Room Attendant/Operator (4.65 percent) occupations, respectively.

5.3 WEIGHTING DIAGRAM FOR WAGE RATE INDEX NUMBERS

One of the main objective of the Occupational Wage Survey is to provide the bench mark data for constructing weighting diagram for the new series of the Wage Rate Index Numbers compiled by Labour Bureau. For the purpose, occupation-wise data on average daily employment and average daily mean wage rates within each stratum of an industry has been presented in Table 5.4. Average daily mean wage has been calculated as the mean of the average daily minimum and maximum wage rates.

5.4 LIMITATION OF THE SURVEY

The average daily wage rate at industry level was observed to contain significantly higher coefficient of variation (41.77 percent). The coefficient of variation of average daily minimum wage rates and average daily maximum wage rates were found to be 45.26 percent and 43.62 percent respectively. Furthermore, the coefficient of variation of average daily earnings was observed to be higher (42.29 percent) than the variations in average daily wage rates. Therefore, results should be analysed keeping in view the variability of the estimates so generated.

All Mining Industries		1419.95	1049.10	-	-	1411.94

(*)—The average daily earnings are less than the corresponding average daily wage rate figures (Table 3.2) because the average daily earnings rates are worked out as the total earnings in a pay period divided by the total number of days paid (i.e. total days worked plus number of days not worked but paid for i.e 30 days, 15 days, 7 days as the case may be) whereas average daily wage rates are worked out on the basis of only days worked (i.e. 26 days, 12 days, 6 days as the case may be as per ILO convention).

**OCCUPATIONAL WAGE SURVEY
SEVENTH ROUND**

**ANNEXURES
ON
FOUR MINING INDUSTRIES
(2017)**

List of 56 Industries selected for coverage under 7th round of Occupational Wage Survey.

(A) MINING SECTOR (The Mines Act, 1952)

- 1 Coal Mines Industry
- 2 Iron Ore Mines Industry
- 3 Manganese Mines Industry
- 4 Oil Mines Industry

(B) PLANTATION SECTOR (The Plantation Labour Act, 1951)

- 1 Coffee Plantations Industry
- 2 Rubber Plantations Industry
- 3 Tea Plantations Industry

(C) SERVICE SECTOR

- 1 Railways Industry
- 2 Public Motor Transport Undertakings Industry
- 3 Ports and Docks Industry
- 4 Electricity Generation and Distribution Industry

(D) MANUFACTURING INDUSTRY (The Factories Act, 1948)

- 1 Sugar Industry
- 2 Oils and Fats Industry
- 3 Processing of Edible Nuts Industry
- 4 Tobacco Products Industry
- 5 Cotton Textiles Industry
- 6 Woolen Textiles Industry
- 7 Silk Textiles Industry
- 8 Synthetic Textiles Industry
- 9 Jute & Others Textiles Industry
- 10 Textile Garments Industry
- 11 Paper and Paper Products Industry
- 12 Printing and Publishing Industry
- 13 Footwear Industry
- 14 Petroleum Refineries Industry
- 15 Chemicals & Gases Industry

List of 56 Industries selected for coverage under 7th round of Occupational Wage Survey.

- 16 Fertilizers Industry**
- 17 Drugs & Medicines Industry**
- 18 Soaps & Detergents Industry**
- 19 Match Industry**
- 20 Glass & Glass Products Industry**
- 21 Cement Industry**
- 22 Iron and Steel Industry**
- 23 Castings and Forgings Industry**
- 24 Agricultural Machinery Industry**
- 25 Textile Machinery Industry**
- 26 Machine Tools Industry**
- 27 Electrical Industrial Machinery Industry**
- 28 Electrical Apparatus Industry**
- 29 Ship Building Industry**
- 30 Locomotives/Wagons Industry**
- 31 Motor Vehicles (Motor Vehicles/Trailors/Semi-Trailors) Industry**
- 32 Motor Cycle/Scooter Industry**
- 33 Bicycles/Rickshaws Industry**
- 34 Aircrafts/Spacecrafts & Parts Industry**
- 35 Tea Processing Industry**
- 36 Tyre and Tube Industries**
- 37 Steam Generators (Boilers) Industry**
- 38 Diary Products Industry**
- 39 Soft Drink Industry**
- 40 Aluminium Industry**

List of 56 Industries selected for coverage under 7th round of Occupational Wage Survey.

- 41 Domestic Appliances Industry**
- 42 Televisions Industry**
- 43 Computers and Peripheral Equipments Industry**
- 44 Watches & Clocks Industry**
- 45 Plastic Articles Industry**

CONCEPTS AND DEFINITIONS

2.1 UNITS/MINES/PLANTATIONS/FACTORIES/ESTABLISHMENTS

The Mines, Services, Plantations and Manufacturing industries registered under the respective Acts constitute the frame for the survey.

2.2 SAMPLE OR SELECTED UNITS/ESTABLISHMENTS

Data collection in the present survey was carried out only in those units which had been selected (or provided as substitute) from the frame of registered factories/Mines/Plantations/Service sector units through the sampling method.

2.3 ESTABLISHMENTS

The establishment is a unit situated in a single location in which predominantly one kind of economic activity is carried out in such a way that at least a part of the goods and/or services produced by the unit goes for sale (i.e. entire produce is not for sole consumption). It means that an establishment is a physical entity where mainly one entrepreneurial activity (or sometimes more than one, with no separate accounts) is carried out. The examples of a unit are: workshop, factory, manufacturing plant, warehouse, shop, office, firm, school, hospital, place of worship, depot, mine, etc.

2.3.1 PUBLIC SECTOR: Establishments which are wholly owned/run/managed by Central or State governments, quasi-government institutions, local bodies like Panchayat, Zilla Parishad, City Corporation, Municipal authorities, etc., autonomous bodies like Universities, Education boards, and institutions like schools, libraries etc. set up by the Government, Panchayat, etc. or those run with more than 50% share of the government are to be treated as government/public sector undertaking.

2.3.2 PRIVATE SECTOR: Establishment owned/managed by a single person or a group of persons with share/participation of the Government / local body less than or equal to 50%, both in terms of management and shares, is to be treated as private sector establishment. An establishment should not be treated as a public sector establishment if it is run on a loan granted by government, local body, etc.

2.3.3 JOINT SECTOR: This sector includes all the establishments which are owned jointly by the Government and Private individuals or

companies (e.g. Corporations). Government here means Central or State Government including Local bodies.

2.4 EMPLOYERS

The self-employed persons who work on their own account with one or a few partners and by and large run their establishments by hiring labor are the employers.

2.5 WORKER

Persons who, during the reference period, were engaged in any economic activity or who, despite their attachment to economic activity, have temporarily abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies constitute workers.

Worker/employees defined as per different Acts relevant to the survey are as under:

2.5.1 The Factories Act, 1948: 'Worker' means a person employed directly or through any agency (including a contractor) with or without the knowledge of the principal employer, whether for remuneration or not, in any manufacturing process or in cleaning any part of the machinery or premises used for manufacturing process or subject to the manufacturing process (but does not include any member of the armed forces of the Union).

2.5.2 The Mines Act, 1952: A person who works as the manager or who works under appointment by the owner, agent or manager of the mine or with knowledge of the manager, whether for wage or not is said to be employed in a mine. It includes persons who work as under:

- (i) In any mining operation (including the concomitant operation of handing and transport of minerals up to the point of dispatch and of gathering sand and transport thereof to the mine).
- (ii) In operation of services relating to the development of the mine including construction of plant therein but excluding construction of building, roads, wells and any building work not directly connected with any existing or future mining operation.
- (iii) In operating, servicing, maintaining or repairing any part or any machinery used in or about the mine.
- (iv) In operations, within the premises of the mine, of loading for dispatch- of minerals.
- (v) In any office of the mine.
- (vi) In any welfare, health, sanitary or conservancy services required to be provided under this act, or watch and ward, within the premises of the mine excluding residential area or.

(vii) In any kind of work whatsoever is preparatory or incidental to or connected with mining operation.

2.5.3 The Plantations Labour Act, 1951: Worker means a person employed in a plantation for hire or reward, whether directly or through any agency, to do any work-skilled, unskilled, manual or clerical, but does not include;

- (i) A Medical Officer employed in Plantation;
- (ii) Any person employed in the plantation (including any member of medical Staff) whose monthly wage exceeds Rupees Seven hundred and fifty only;
- (iii) Any person employed in plantation primarily in a managerial capacity notwithstanding that his monthly wages do not exceed Rs. 750/- or,
- (iv) Any person temporarily employed in the plantation in any work relating to the construction/development or maintenance of buildings, roads bridges, drains or canals.

2.5.4. The Indian Railways Act, 1890: Railway servant means any person employed by a Railways Administration in connection with the service of a Railway. The scope of this definition is restricted to such railway servants who are not covered by the Factories Act, 1948, the Mines Act, 1952 and the Merchant Shipping Act, 1958.

2.5.5. The Motor Transport Workers Act, 1961: Motor transport worker means a person who is employed in a motor transport undertaking directly or through an agency, whether for wages or not, to work in a professional capacity on a transport vehicle or to attend duties in connection with the arrival, departure, loading or unloading of such transport vehicle & includes a driver, conductor, cleaner, station staff, line checking staff, booking clerk, cash clerk, depot clerk, time keeper, watchman or attendant, but except in section 8 does not include:

- a) Any such person who is employed in a factory as defined in the factories act, 1948.
- b) Any such person to whom the provision of any law for the time being in force regulating the condition of service of persons employed in shops or commercial establishments apply.

2.5.6. Dock Workers (Regulations of employment) Act, 1948: Dock workers means a person employed or to be employed in a port, or in the vicinity of any port on work in connection with the loading, unloading, movement of storage of cargoes or work in connection with preparation of ships or other vessels for the receipt or discharge of cargoes or leaving port.

2.6 WORKERS COVERED (TYPE OF WORKERS)

Full-time manual workers on pay rolls of the establishment as covered under the respective acts were considered. Persons employed in fire services, watch & ward, sanitary department, etc. was also covered if they were performing manual jobs. The data was not collected in respect of workers holding a non manual post (i.e. managerial, technical, administrative, clerical, etc.) even though they are covered under the respective act. All types of full time manual workers viz regular, contract, casual, badli & apprentices, working more or less on regular basis, were covered.

2.6.1 Manual Workers: Workers whose job involves physical labour are called manual workers. The emphasis is on considerable element of manual work. Thus, workers engaged primarily on jobs which can easily be classified as manual were covered. For instance, foreman & jobbers & other supervisory staff, whose duties, besides supervision, generally involve manual work, were considered manual workers.

2.6.2 Time Rated worker: Time rated worker means persons who are paid according to the time of their engagement. The payment may be made on monthly, fortnightly, weekly or daily basis. However, the wages of time-rated workers are pre determined for a specific period of time and are not directly related to their output.

2.6.3 Piece Rated Worker: The piece rate system is that system of wage payment in which the workers are paid on the basis of the units of output produced. Piece rate system does not consider the time spent by the workers. It is the system of remunerating the workers according to the number of units produced or job completed. It is also known as payment by result or output. Piece rate system pays wages at a fixed piece rate for each unit of output produced. The wages of piece rated workers are linked to their individual or group output.

2.6.4 Full Time Worker and Regular Worker: Full time worker means the worker who works for entire time of a shift wherein the employee works and earns the normal wage prescribed for the shift. The actual hours of work for an employee in a particular job or industry are agreed between the employer and the employee and/or set by an award or registered agreement. The workers, who work on permanent/regular basis, are directly employed by the employer for relatively longer unspecified period and are entitled to certain legal protections and benefits such as pension, paid/job protected leaves etc. are termed as regular workers.

2.6.5 Contract workers: Workers, who are employed for a specified period/specific job & are usually paid only for days of work, are known as contract workers. They may be employed directly by the principal employer or by the intermediate employer, called contractors. Such workers usually do not receive benefit packages, pensions or other perquisites provided to employees and do not have entitlements to basic

employment rights such as health and safety protections, job-protected leaves and some legal rights applicable to regular employees. Contract workers may not be borne directly on the establishment strength, yet work within the premises of the establishment.

Information was collected from contract labour as well. In certain cases, the employers entrust the execution of certain jobs to persons known as Headman or Sirdars. These Headmen or Sirdars are given the necessary equipments & raw materials but not the manpower, which they employ through their resources for execution of the job. In such cases, Headmen featured in the pay roll for the purpose of the survey but not the workers engaged by them. If the workers engaged by the Headman or the Sirdars worked within the premises of the establishment, then such workers were covered under the Survey. If employer maintained records in respect of such workers then data was collected from such records, otherwise attempts were made to obtain the necessary information from Sirdars/Contractors/Headmen themselves. If it was found that neither the principal employers nor the Sirdar, etc. maintained any record of employment and earnings of contract labour and it was not possible to collect necessary data, then the contract labour data was ignored.

2.6.6 Badli Workers: A Badli worker is a substitute working in place of an absentee worker. There are some production processes which involve working like in a chain, making each worker's performance a link in that chain. If for some reason, a regular worker in that chain does not turn up for duty, the work will, evidently come to a stop. To meet such situation the management recruit badli worker before the start of each shift replacement at the factory gate. The replacements are known as Badli. For the purpose of this survey, these workers were classified into following three groups:

1. Badli workers who are recruited on a day to day basis to work in place of regular workers who are absent,
2. Badli workers who are working continuously for at least a month and,
3. Regular group of badlies in permanent employment of units who are put on different jobs to meet casual requirements of different sections.

So far as workers in group-1 above were concerned, they were ignored outrightly. Those in group -2 & group-3, above generally known as regular badlies & they were taken into account in the occupations in which they worked during the pay period covered only if they had worked for a period of at least one month, preceding the reference date (and received wages , full or part even for those working days on which no work was given to them).The badlies of group-2 & group-3 were considered as part of the occupation to which they were attached for the major part of the reference pay period.

2.6.7 Casual Workers: A casual worker is one whose employment is of a casual nature. That means he is a person who is employed on day to day

basis, as and when the occasion arises, without any assurance for future employment. He is in employment when he is at work. Workers with this designation/token are ordinarily to be ignored like badli workers of group-1 referred under para-2.6.6. But sometimes in terms of mutual agreement, etc. between workers & employers some units merely designate a group of workers as casual workers and employ them on a regular basis, such workers were termed as regular casual workers & covered in the survey.

2.6.8 Apprentices: An 'apprentice' is a person/learner who is learning a trade/work from a skilled employer, having agreed to work for a fixed period and who may or may not be paid an allowance during the period of his training. Data in respect of them is also to be collected only for Block II & III.

2.7 REFERENCE PERIOD

Reference date for collection of data in the schedule for 7th round of OWS was 30th June, 2016 for all the four sectors.

2.8 SURVEY PERIOD

The survey period for Four Mining Industries during the Seventh round of OWS was July, 2016 to December, 2016.

2.9 PAY PERIOD

Pay period means the duration of interval at the expiry of which wages due in the interval are payable. It may be month or a fortnight, a week or even a day. The data was collected from each unit in respect of a pay period ending on the reference date or wherein the reference date falls.

2.10 WAGE RATE

Wage rate may be defined as the price of working energy spent by a worker either for a specified period of time or for a specified measure of performance. This rate is settled in advance between the employer & employee. Basic Wage & Dearness Allowances are the reliable indicators of the wage rate. Besides, fairly significant proportion of the industrial units in the country, do not pay separate dearness allowance to their employees, what they pay is consolidated wage. The consolidated wage is not comparable with the basic wage paid by the

units, which pay separate dearness allowance. The existence & extent of other components of remuneration such as overtime, house rent allowance, medical allowance, etc. differ not only from industry to industry but from unit to unit within the same industry and cannot therefore be included as part of wage rate.

2.11 PAY ROLL EARNINGS

This term represents the total amount received by an employee in a pay period and includes basic wage, dearness allowance, special allowance, production bonus, compensatory allowance, overtime earnings & other cash allowances which are paid to the workers more or less on regular basis. As such wage rates are distinct from Pay roll earnings, as the former reflects the rate at which wages are paid while the latter indicates the sum of wages & allowances actually earned by an employee.

2.12 CHILDREN & ADOLESCENTS

Child labour & adolescent workers as prescribed under the relevant acts are given below:

Act	Children	Adolescent
Factories act	14 years & above and up to 15 years	15 years & above & up to 18 years
Mines act	Not permitted	a) Above ground-15 years & above & up to 18 years. b) Underground -16 years & above & up to 18 years.
Plantation Labour act	Below 14 years of age	14 years & above & up to 18 years
Motor transport act	Below 14 years of age	14 years & above & up to 18 years

2.13 DEARNESS ALLOWANCE

Dearness allowance is an adjustment, either fully or partly, in the pay packet of workers, for any rise or fall in cost of living due to fluctuations in the general price level. Dearness allowance is also known as Dearness pay, Variable Dearness Allowance (VDA), Inertia Relief (IR) & Additional Dearness Allowance (ADA).

2.14 OCCUPATION

An occupation is a brief description of distinct group of workers engaged in well defined jobs or similar type of work, requiring operation skill in production of goods/services viz. Fitters, Welders, Weavers, Carpenters, driller, etc.

2.15 MATCHING OF OCCUPATIONS

Matching of occupations means classification of workers of the selected establishment into appropriate occupations as shown in the lists of occupations. The workers of an occupation may have been given variety of designations in different establishments according to the work requirements of the establishments concerned. The primary purpose of the list is to enable the classification of these titled occupations into single and well defined occupation. This can best be done by comparing the occupations obtained in the units with those given in the lists, on the basis of job contents. While matching the occupations, the fundamental criterion to be kept in view is the type of work performed. For this purpose, the help of the knowledgeable persons of the unit concerned should be taken and their expert advice followed.

It may happen that in some of the units some workers worked in more than one occupation, within a pay period. In such a situation, the worker(s) were shown as belonging to that occupation wherein they have worked for the largest number of days in the pay period. Their wage rates related to the occupations in which they were classified.

For purpose of Earnings Block, the earnings of such workers (whether time-rated or piece-rated) related to the whole pay period and not merely to the period for which they had worked in the occupation wherein categorized.

The Field officers during the course of the survey came across situations where the workers in a unit were classified differently in categories say A, B, C, D or according to their degree of skill i.e. highly skilled, semi-skilled, skilled etc and break-up of workers according to occupation in which they were actually engaged was not available. In such a case the Field Officers had discussions with knowledgeable persons in the unit and identified the workers according to the occupations in which they were actually engaged during the reference period. In case where a worker remained engaged in more than one occupation during the reference period, the Field Officer classified the worker under that occupation wherein the worker remained engaged for the major portion of the reference period.

2.16 CLOSURES

A unit was treated as closed in the following situations:

- a) Permanent Closure i.e. the unit has not been functioning since the reference period and has also not worked during the three succeeding months of the reference month and is also not likely to function in the near future.
- b) Registration of the unit, is under the industry other than the one under which it is shown in the sample list.
- c) Change in the line of production of the unit from the industry under which it was selected to some other industry.
- d) Not traceable even after local postal enquiries and verification from the State Authority of the area.
- e) De-registration of the unit, e.g. due to amalgamation, fragmentation, or coverage under some other Act, etc.
- f) Records not available for the reference period or the period one month preceding or succeeding the reference period.
- g) Shifting of unit from one stratum of the industry to another.

In the situations given below, the unit was not treated as closed and was covered:

- a) Temporary closure during the reference period i.e., the unit did not function during the reference period but has started functioning subsequent to the reference period or is likely to start functioning in the near future. In such cases, the data may be collected for the pay period nearest to the reference period falling within 1 to 3 months preceding or succeeding the reference month.
- b) Reference period not being a normal period of working for the unit due to any reason, such as power cut, go slow, labour trouble, shortage of raw material, etc. In such cases, data should be collected for normal pay period nearest to the reference period and falling in the one preceding or succeeding the reference month.
- c) The unit is not in a position to supply the required data, as the records are not available at the premises due to one reason or the other. In such a situation, the unit has to be covered by going to the place where records are available, be at the Headquarters of the Unit or at the changed address. If, however, the management

assures the Field Officers that it will make available the records and suggests a subsequent date for the Field Officer's visit, the same may be done and action taken. In both the above situations, Supervising Officer should be consulted under intimation to the Headquarters.

- d) Mere change in either the name of the unit or its premises/ownership will not warrant its exclusion from coverage.
- e) If in a unit, the production relates to more than one industry, including the industry under which it is selected, the unit is to be treated as working and data has to be collected in respect of only those persons who are engaged in the occupations relevant to the industry in which the unit is shown in the sample list. In case a person employed in the unit is engaged in the work pertaining to more than one industry, then he should be taken as belonging to the industry to which he devotes the major portion of his working hours.

SAMPLING DESIGN AND ESTIMATION PROCEDURE

1.0 SAMPLING DESIGN

1.1 INTRODUCTION

The sampling design for the Seventh Round of Occupational Wage Survey (OWS) consisted of two stages. The first stage sampling units were the registered factories, while the second stage sampling units were the workers employed in different occupations in the first stage units.

1.2 SELECTION OF ESTABLISHMENTS (FIRST STAGE)

The first step in the selection of sample establishment was the determination of sample size. It was found desirable to determine the sample size in such a way that the permissible error in the average maximum wage rate would be 5 percent with 95 percent confidence interval. For the purpose of statistical exercise, average maximum wage rate was derived as weighted average of maximum wage rate of all the occupations in each of the sample units covered during the Sixth Round. The weights were the number of workers employed in the different occupations in the sample units. The formula used for the determination of the sample size at the industry level is given below.

$$n_o = \frac{\sum W_i \cdot S^2_i}{[0.05 \cdot \bar{Y} / 1.96]^2} \quad \text{and} \quad n = \frac{n_o}{1 + n_o/N}$$

where,

N = Number of units in the frame

n_o = First approximation for the sample size

n = Required sample size

$W_i = (N_i - 1)/(N - 1)$ = Weight for the i^{th} stratum

N_i = Number of units in the i^{th} stratum in the frame

$S^2_i = \frac{1}{N_i - 1} \sum_{j=1}^{N_i} (Y_{ij} - \bar{Y}_i)^2$ = Variance of the i^{th} stratum

\bar{Y}_{ij} = Average maximum wage rate in the j^{th} unit of the i^{th} stratum

\bar{Y}_i = Mean of the average maximum wage rate in the i^{th} stratum

As the sample size yielded by the above formula related to stratified random sampling with proportional allocation, the share of each stratum was allocated in proportion to its share in the frame at all India level.

For this purpose, the frame in each stratum was divided into two size classes, viz. Upper Size Class and Lower Size Class. The average daily employment at the national level for an industry was used as the cut-off

ANNEXURE-III

point for classifying the units in an industry into these classes. All the units with employment above the cut-off point were taken in the upper size class while the remaining was taken in the lower size class in each stratum. While allocating the sample size in the both the size classes in proportion of its frame size within a stratum, it was taken care that at least two units were selected in each size class.

In order to draw the required number of sample units determined in accordance with the procedure described above, the frame units in each size class within a stratum were arranged in the alphabetical order of states and within each state in the descending order of employment.

The required number of sample units in each of the two size classes of a stratum was then drawn on the basis of simple random sampling without replacement. Provision for the selection of substitute units was also made so that the required sample size in each industry was obtained.

1.3 SELECTION OF WORKERS (SECOND STAGE)

The Second Stage Sampling was used for collecting data for estimating payroll earnings only and not for other variables where data in respect of entire sample unit was collected. For the purpose of obtaining reliable estimates in respect of the pay roll earnings of workers in each occupation, it was decided to draw a sample of workers belonging to each category of sexage, type of workers and system of payment in proportion to the number of workers in each such category in the total work force in an occupation. For this purpose, the following sample size was adopted.

Sl. No.	Occupations Employing Workers	Maximum Sample Size
1	Up to 20	6
2	21 - 50	8
3	51 - 100	12
4	Above 100	16

The number of workers required for the study was drawn from each occupation in each establishment on the basis of random sampling in such a way as to ensure that each category (by sex-age and system of payment) was represented in the sample in proportion to the respective strength in the total workforce of the occupation.

2.0 ESTIMATION PROCEDURE

The estimation procedure for the Survey was, designed to obtain estimates for all the three important characteristics, namely, employment, wage rates and earnings by occupations. The estimation procedure adopted for each of these characteristics is given below.

2.0.1 AGGREGATES (EMPLOYMENT AND TOTAL WAGE)

Estimation of the number of workers was done for each sexage group and each category of workers by system of payment of wages in each occupation in a stratum of an industry. The corresponding multiplicative inverse of the sampling fraction in each employment size class of a stratum was used as the multiplier for the estimation.

$$\hat{Y} = \frac{N_u}{n_u} \sum_{i=1}^{n_u} y_i + \frac{N_l}{n_l} \sum_{i=1}^{n_l} y_i$$

where,

- \hat{Y} = Estimated value of the characteristic under study
- N_u = Total number of units in frame in the upper size class
- N_l = Total number of units in frame in the lower size class
- n_u = Total number of units in sample in the upper size class
- n_l = Total number of units in sample in the lower size class
- y_i = The value of the characteristic under study (like number of time-related male workers, number of workers engaged in a given occupation, total daily wages paid to women workers in given occupation, and so on) for the i -th sample unit in the upper or lower size class of the stratum as the case may be.

PAY ROLL EARNINGS

On the basis of the data on pay roll earnings collected for the sample workers in each occupation in each sample unit, average daily earnings per day paid for were estimated for men, women, adolescents and children. The formula for estimating total pay roll earnings, y_i for the i -th sample unit is estimated based on data pertaining to sample workers in the unit as given below:

$$\hat{y}_i = \sum_{j=1}^K \frac{W_{ij}}{w_{ij}} \sum_{k=1}^{w_{ij}} y_{ijk}$$

Where,

- y_{ijk} = pay roll earnings of k -th sample worker in j -th occupation of i -th sample unit in the upper/lower size class of a stratum
- w_{ij} = total number of workers engaged in j -th occupation of i -th sample unit
- w_{ij} = number of sample workers in j -th occupation of i -th sample unit in respect of whom the information on pay roll earnings were collected
- K = Total number of distinct occupations having workers in the i -th sample unit

ANNEXURE-III

The sum of stratum level aggregates over all strata gives the overall i.e. all-India estimate of aggregate of any given characteristic.

All-India estimates of average daily earnings of workers are obtained as the weighted average of the corresponding stratum level estimates, weights being the estimated number of workers in each stratum.

Average daily earnings of workers were separately estimated for basic wage, dearness allowance, and house rent allowance, etc. These figures were estimated without any reference to either sexage or the system of payment. The procedure involved in the estimation of these figures was the same as that described earlier.

2.0.2 RATIOS

For any given domain of study, ratios like average daily wage rates and average daily earnings are estimated by dividing estimated total daily wages / earnings by corresponding estimated total number of workers.

2.2 COEFFICIENT OF VARIATION

(a) The coefficient of variation of average daily earnings was calculated for each stratum in an industry after obtaining the estimates of mean square S^2 for the population and mean per unit of the population \bar{Y} separately for the stratum. The mean square for the population of a stratum in an industry was estimated by the sample mean square of the stratum, whereas, the mean per unit of the population of a stratum in an industry was estimated by the sample mean of the stratum.

In symbol, the sample mean square and sample mean of average daily earnings in j^{th} stratum in the i^{th} industry are defined, respectively, by:

$$\hat{S}^2_{ij} = \frac{1}{(n_{ij} - 1)} \cdot \sum_{k=1}^{n_{ij}} (y_{ijk} - \hat{Y}_{ij})^2$$

And

$$\hat{Y}_{ij} = \frac{1}{n_{ij}} \cdot \sum_{k=1}^{n_{ij}} y_{ijk}$$

where,

- \hat{S}^2_{ij} = Sample mean square of average daily earnings in j^{th} stratum in the i^{th} industry
- \hat{Y}_{ij} = Sample mean of average daily earnings in j^{th} stratum in the i^{th} industry
- y_{ijk} = Average daily earnings of the k^{th} sample worker in j^{th} stratum in the i^{th} industry

ANNEXURE-III

n_{ij} = Total number of sample worker in j^{th} stratum in i^{th} industry

Sample mean square and sample mean of average daily earnings for an industry were calculated as the weighted average of sample mean squares and sample means respectively, of different strata in an industry, weights being the proportion of number of units in the frame in different strata in an industry. In symbol,

$$\hat{S}^2_i = \frac{1}{(N_i - 1)} \cdot \sum_{j=1} (N_{ij} - 1) \cdot \hat{S}^2_{ij}$$

and

$$\hat{Y}_i = \frac{1}{N_i} \cdot \sum_{j=1} N_{ij} \cdot \hat{Y}_{ij}$$

where,

\hat{S}^2_i = Sample Variance of average daily earnings in the i^{th} industry

\hat{Y}_i = Sample mean of average daily earnings in the i^{th} industry

N_{ij} = Number of units in the frame in j^{th} stratum in the i^{th} industry

N_i = Number of units in the frame in the i^{th} industry

Sample mean square and sample mean of average daily earnings combined for four mining industries were then calculated as the weighted average of sample mean squares and sample means respectively, of different industries, weights being the proportion of number of units in the frame in different industries.

The coefficient of variation was calculated for each occupation in an industry using the same method described above.

(b) The coefficient of variation of average daily wage rates was calculated for each stratum in an industry using the same methodology as adopted in calculation of the coefficient of variation for the average daily earnings described in part 2.2(a).

**LIST OF OCCUPATIONS WITH BRIEF JOB DESCRIPTIONS FOR
MINING INDUSTRIES**

Occupation		Job Description
Code	Name	3
1	2	

COMMON OCCUPATIONS

0005	Blacksmith	Forges metal to required shapes and size by processes of heating, bending, hammering, etc. Heats metal in furnace to the required degree of temperature. Sharpens the various tools used in the factories and performs other jobs connected with the smithy shop.
0006	Boiler Attendant	Operates boilers to generate steam of required pressure by controlling and adjusting water feed, draught, evaporation, fire, etc., for heat or power.
0009	Cable Jointer/ Cableman	Joints multi conductor cables consisting of a number of coloured wires. Selects strands of wires to be joined from cable ends according to colour code.
0010	Carpenter	Makes, assembles, alters and repairs wooden structures and articles using hand or power tools or both.
0011	Chargehand	Instructs and directs operators in assembling and erecting different kinds of selector, racks, relay set sacks, etc.
0012	Chargeman	Operates motor generator and other electrical equipment.
0013	Checker	Verifies quantity, quality, condition, value and types of goods produced or material purchased and sold with reference to records and reports of specifications. Checks proper markings and labels according to instructions.
0015	Compressor Operator	Operates and services power driven air compressor which generates and supplies compressed air to drive pneumatic tools, hoists and other mechanical equipment.
0016	Coolie/ Mazdoor	Performs various unskilled jobs such as lifting and carrying loads, cleaning and sweeping loom sheds, machine rooms, etc.
0018	Crane Operator	Operates stationary or mobile overhead crane to transport material.

0022	Driller	Drills holes in metals according to specifications by means of twist drill or other drilling machines, or by hand
0023	Driver	Drives trucks, lorry, car or tractor for transporting goods or men. Attends to minor repairs.
0024	Electrician	Installs, maintains and repairs electrical machinery, equipment and fittings. Repairs or replaces defective wiring, burnt out fuses, defectives parts and keeps fittings in working orders.
0025	Engine Room Attendant/ Operator (Power)	Looks after engine room. Operates steam engine in the event of failure of electricity.
0026	Fireman	Shovels coal into boiler to generate steam at required pressure. Adjusts steam pressure by regulating feed of coal and water.
0027	Fitter	Sizes metal parts accurately according to drawings by sawing, chipping, filling, scrapping, drilling etc. Fits and assembles them as required and does necessary repairs himself.
0028	Foreman (Mechanical/ Electrical)	In-charge of group of workers in his department. Supervises & guides workers engaged in various processes and controls operations of respective departments.
0029	Furnaceman	Operates various types of furnaces for smelting, converting and refining of metals and performs a variety of related tasks such as, tending stove to heat blast for blast furnace.
0030	Gas Cutter/ Flame Cutter	Cuts metal to required shape and size by flame either manually or mechanically.
0032	Hammerman	Hammers iron and steel to required dimension with sledges according to the direction of Blacksmith. Selects sledges according to the nature of forging and strikes hot metal hard or light as per direction of the Blacksmith.
0033	Helper	Helps the skilled workers in their jobs. Performs various types of semi-skilled and unskilled jobs.
0034	Instrument Mechanic	Tests, repairs and overhauls various instruments and their parts for efficient performance.
0035	Lineman	Erects and maintains overhead electric power

		lines to supply electricity to the place of use.
0036	Loader/Unloader	Loads/unloads heavy materials, etc. from wagons and trucks.
0037	Mistry/Kangani	Guides & supervises the kangani workers under his charge and does intricate jobs himself.
0039	Mason	Lays bricks, mortars and other construction material to construct and repair walls, floors and other structures. May do plastering also.
0040	Mate/Mukaddam	Supervises and directs a group of mazdoors or unskilled/semi-skilled workers doing such jobs as carrying material/finished products, bottling, packing, and operating different types of machines, engines, etc.
0041	Mechanic (General)/ Technician	Attends to installation, repair, maintenance and examination of various types of machinery.
0043	Motor Mechanic	Repairs, overhauls and services motor vehicles to keep them in good running order. Also carries out repairs of internal combustion engines.
0044	Moulder	Prepares, moulds and cores from foundry sand using pattern for casting metal parts and helps in casting the same.
0045	Oilman/ Greaser	Cleans and lubricates various types of engines or machinery or looms etc. May make minor adjustments, tighten loose parts and assist machine operators or mechanics.
0049	Picker	Picks up waste from the raw material.
0052	Plumber	Lays out, assembles, installs and maintains sanitary fittings and fixtures, sewage and drainage system, gas & water pipelines, etc.
0055	Pump Attendant	Operates power driven pumps for pumping, storing and supplying liquids. May also repair and clean, oil and grease the pump.
0056	Rigger	Erects lifting and hauling pulleys, wire ropes, etc. to lift, move or lower heavy articles.
0061	Shot Firer/Blaster	Transports explosives to the destination in a safe manner, guides for safe transport when unskilled persons are deployed for the job, prepares explosives for charging blast

holes, charges and blasts them, trains and guides unskilled workmen deployed for the job, inspects the mine when blasting is over and defuses unexploded explosives. Takes prescribed precautions in case of misfire. Maintains the magazine in a neat, clean and safe manner, accounts for the receipt and usage of explosives, number of shots fired and does all other work incidental there to.

0065	Supervisor	In-charge of a group of workers in his unit. Guides and supervises the workers under his charge. Also handles intricate jobs himself.
0066	Sweeper	Cleans and sweeps factory premises, toilets and removes garbage.
0067	Switch Board Attendant	Operates and attends to switches and switch gears on switch board to regulate flow of electric current from power house or sub-station to different feeding units
0070	Tindal	Handles machinery in the workshop and helps its erection and dismantling.
0072	Tongsman	Holds billets as they come out of rolls with the help of tongs and swiftly returns the same to the roller for re-rolling.
0075	Turner	Makes metal articles to required specifications using lathe and cutting tools, cleans and oils machine.
0077	Watchman	Guards buildings, premises, industrial plants, ware houses, etc. against fire, theft, illegal entry and other such contingencies.
0078	Weigher	Weighs materials and products to determine whether they conform to specifications for use in production processes or for purposes of trade and commerce, using balance, platform or floor.
0079	Welder	Welds, cuts or fuses metal parts with electric arc/gas flame by hand or machine. May strengthen the joints with molten metal.
0080	Winch Driver	Operates power driven winch (winding engine) for hauling up and down men or materials.
0085	Machine Operator/ Machinist	Operates one or more types of machines such as grinding boring, milling, moulding, shaping, drilling, computer numerical control etc. used for various operations. May clean and oil machine.

0091	Gen./Turbo Operator	Operates the generator/turbo generator used for producing electricity. May clean and oil machine.
0092	Khalasi	Loads and unloads heavy goods. Assists the driver in operating the instruments. Cleans and lubricates the machines.
0093	Store Keeper/ Staff	Receives and issues various types of goods, tools, equipment and raw materials and maintains records of each such items. Ensures proper storage and preservations of these items in the storeroom.
0094	Apprentices/ Trainees	Workers trained in different trades engaged for on the job training in the factories. These workers are also paid for the work done by them.
0095	Cook	Directly engaged in preparation of food/meals.
0096	Chemist/ Dispensary	One who keeps first aid medicines and other materials for immediate treatment in case of accidents, etc.
0097	Banksman	He is responsible for all banking related jobs and requirements of office.
0098	Clay Cardidge Maker	One who is engaged in clay making activity for mining operations.
9900	Miscellaneous	Other minor occupations not classified elsewhere are classified as miscellaneous occupation.

INDUSTRY:**COAL MINES**

3601	Chain Man	Goes underground with the surveyor and holds the measuring line, etc. for determining proper height for digging of gallery for mining operations.
3602	Calipman/ Pointsman	Couples and uncouples sets of trains of coal carrying tubs. Directors the movement of tubs so that they do not clash at point of crossing and give signals to haulage khalasi.
3603	Coal Cutting Machine Mazdoor	Assists coal cutting machine operator in positioning the machine against working face, carries his tools and renders him other assistance in his work.

3604	Coal Cutting Mistry	Sets and operates electric or pneumatic coal cutting machine for loosening coal working face for blasting by making undercuts below coal seam upto specified depth. Lubricates, adjusts and does minor repairs to the machine.
3605	Dresser	Dresses the roof, sides and floor of a pillar or gallery of coal generally after shots have been fired, in order to render the working place safe for work.
3606	Explosive Carrier	Caries explosives detonator and fuses to different places as directed.
3607	Haulage Khalasi/ Coal Filler	Operates the engine which pulls loaded and unloaded tubs on the haulage tracks by means of wire rope. May also undertake repairs.
3608	Haulage-Cum-Switch Attendant/Opt.	Operates haulage from 125 HP and above and also puts on and off mine switches placed at a nearby distance.
3609	Khalashi/Fan/ Survey	Operates the engine/motor which drives the fan, pump, compressor, crane, conveyor etc. Cleans and lubricates the motors and assists fitter and electrician. Also takes and records readings of instruments.
3610	Lamp Fitter	Assist the lamp room incharge in his work.
3611	Long Hole Drill Helper	Assists the machine operator in setting with drawing, extending and shifting the machine and other allied matter in connection with the operation of the machine.
3612	Load Haul Dumper Operator Grade-II	A skilled workman who operates the equipment and has working knowledge of the same for undertaking minor running maintenance and operates the loader of bucket capacity of less than 0.75 cubic metre.
3613	Loco Driver	A workman employed to drive locos which are engined by petrol/diesel or electric motors. Light locos are employed for various haulage works on the surface, while diesel or electric locomotives of considerable horse power, tractive effort and weight may be used underground.
3614	Miner	Extract coal from coal pillars inside mines using crowbar and pick axe after coal pillars are blasted by shot firer.
3615	Mistry/Line Mistry	Lays and maintains tracks or lines on which then tubs or mine cars run.

3616	Mine Service Crew	A group of workmen engaged in transporting and withdrawal of the material used in mining operations, conveyors, ventilation tubes, pipes, rails, support materials etc. manually by using mechanical devices. They have to handle tubs/mine cars, trolleys for transporting materials. They will work along with fitters and helpers wherever required.
3617	On Setter	Controls the movement of cage at shaft bottom and directs winding engine driver and banksman for its repairing and lowering by electrical or mechanical signal system.
3618	Roof Bolting/ Stitching Crew/ Stitching Mistry	A workman engaged in roof bolting, side bolting and roof stitching in all types of strata for the purpose of mine support. They carry all materials and equipments and accessories for the purpose and assist the mistry in all connected operations.
3619	Safety Lamp Checker/Lamp Room Incharge	Repairs, tests, cleans and changes safety lamps used by underground workers. Issues the lamps to miners and receives them back. May keep a record of men underground by number of lamps issued.
3620	Shale Picking Mazdoor	Separate shale or interior coal in the picking belt or when steam coal or rubble coal is being loaded direct into the wagon from the depot.
3621	Sub-Station Attendant-Cum- Electrician Helper	Attends to the main switches in an electric sub-station in order to put circuits into commission and to restore the electric current to any circuit in case the switch trips. He also ensures that the transformers in the sub-station are not overloaded.
3622	Screening Plant Worker	Switches the motor driving the machine 'on' or 'off' as required, attends to lubrication and calls a member of the supervisory staff as required. Such men are almost invariably surface workers. Steam engines may also be employed to drive the machine.
3623	Dragline Operator	Drives scrapper/dragline which collects sand for stowing purposes. The degree of aptitude required varies but for large scrapers with which 100 tons per hour may be hauled, the operator ranks in status with a man operating large haulages or winders. His duties include paying attention to signals, periodic and necessary cleaning and lubrication.
3624	Side Dump	A workman assisting the operator for all

	Loader Helper	work in connection with the operating and maintenance of the machine.
3625	Senior Roof Bolter	A skilled workman, who along with the crew attached with him, drills in all types of strata and installs roof bolts, side bolts, ropes and other accessories for the purpose of mine supports and controls work of the new workers attached to him. He ensures from time to time that numbers of bolts are kept in proper order.
3626	Side Dump Loader Operator Grade-III	A skilled workman operates the equipment and has working knowledge of the same for undertaking minor running maintenance. Operates loader of bucket capacity less than 0.75 cubic metre.
3627	Timberman/ Timber Mistry	Examine roof and side walls of haulage ways, air passages, shafts, galleries etc. inside the mines and erects timber or steel props, frames etc. To support them. Also removes or repairs the defective props fixed earlier.
3628	Trammer Underground or Surface/Trolley Man	Pushes loads and empty cars or tubs on rails to specified places in the mine. Sets track points and controls movement of cars or tub while pushing.
3629	Timber Treatment Plant Operator	A skilled workman who operates the plant and its accessories according to schedule of operation and maintenance and maintaining correct pressures and specifications of the preservative required for the purpose. He keeps the plant in near and tidy condition and maintains log book for the plant.
3630	Stone Cutter	Cuts drains in the floor strata, makes sumps for water and holes in stone for blasting etc.
3631	Basket/Tub Loader	Worker engaged in loading of blasted coal with basket/shovels into the tub,. Mine cars.
3632	Workshop Mechanic/ Dozer opt./ Shovel Opt.	Workers on various types of machines such as drilling machine, lathe sawing machine, welding equipment etc.
	INDUSTRY:	IRON ORE MINES
3701	Attendant	Operates pumps, belt conveyors, compressors,

		feeders, crushers, screens and other mining equipment. Attends to lubrication of the equipment.
3703	Miner	Extracts iron ore rolls down the loose boulders with the help of crowbar.
3704	HEMM Operator	Operates pneumatic or electric shovel machine to load mine cars or tubs with wastes or mineral rocks. May also operate tractor and heavy earth moving equipments like bulldozer, motor grader and excavator, etc. Undertake minor repairs of these machines.
3706	Skip Loader	Operates the lever of the bunker for loading/unloading and skip.
3707	Gangman	Carries out maintenance and repairs of tracks and clears obstructions to tracks.
3708	Screener and Cleaner	Cleans out dust from ore by passing it through sieves and jigs the same for separating jigged ore and tailings.
3709	Stone Cutter/ Cutter/ Crusher	Cuts drains in the floor strata, makes sumps for water and holes in stone for blasting etc.
3710	Chainman	Goes underground with the surveyor and holds the measuring line, etc. for determining proper height for digging of gallery for mining operations.
3711	Spotter	Ensures dumping area is not cracking and is safe, safety beams are at required height. Works with dozer operator to ensure dump is carried at required level. Follows instructions, procedures and regulations from respective supervisors.
	INDUSTRY:	MANGANESE MINES
3801	Cap Lamp Attendant	Repairs, tests and changes safety and cap lamps used by underground workers. Issue lighted lamps to miners and receives them back. May keep a record of the number of lamps issued.
3802	Dresser	Dresses roofs of working galleries in underground and open cast mines before the commencement of actual mining operations to ensure that there are no loose stones hanging from the walls after the previous shift's blasting. He may also attend to the

		work of breaking the ore in convenient sizes with the help of hammer and classify it according to grade.
3803	Miner/Miner Metal Excavator	Develops and extracts ore from open cast workings by breaking blasted slabs and dressing roof, sides and face of working places with crowbar, shovel, hammer, etc. Also loads the ore and other materials into the tubs for transporting them to the destination.
3804	Ore Washing Operator	Washes manganese ore to remove dirt and impurities.
3805	Screener and Cleaner/Jigger	Cleans out dust from ore by passing it through sieves and jigs the same for separating jigged ore and tailings.
3806	Tramline Worker	Lays and maintains underground and surface tramlines.
3807	Mines Incharge/Engineer	Incharge and responsible for all mining activities carried out within the premises of factory.
3808	Spotter	Ensures dumping area is not cracking and is safe, safety beams are at required height. Works with dozer operator to ensure dump is carried at required level. Follows instructions, procedures and regulations from respective supervisors.
3809	Hemm Operator	Operates pneumatic or electric shovel machine to load mine cars or tubs with wastes or mineral rocks. May also operate tractor and heavy earth moving equipments like bulldozer, motor grader and excavator, etc. Undertake minor repairs of these machines.
3810	Dumper Operator	Operates dumper machine to load mine cars or tubs with wastes or mineral rocks. Undertake minor repairs of these machines.

INDUSTRY: OIL MINES

4603	Chemical Attendant/ Tradesman (Chemical)	Supervises the work of mud juggles in the manufacture, maintenance and reconditioning of drilling muds including chemical treatment, watches the circulating system, tests cement, and air/gas mixtures for combustibility.
4604	Chemical	Starts and switches off chemical pumps,

	Doser/Operator (Water Injection)	operates valves to adjust injection, rates and pressures. Places and removes charts from meter and records. Makes minor adjustment to meters. Prepares chemical.
4605	Cleaner	Cleans and lubricates moving parts of machinery of vehicles and performs other related tasks. Reports apparent defects to mechanic. May fill radiator with water, tighten loose parts such as bolts and nuts.
4607	Khalasi	Loads and unload heavy goods. Assists the oil well driller in setting and operating power driven drilling machines.
4608	Machinist Boring Operator	Sets up and does the job on the table or on the fixtures. Selects appropriate cutting and grinding tools for the job. Fixes cutting tools and machines to the required dimension by operating valves.
4609	Meter Att./ Technician (Power)/ Opt.(Power)	Records meter readings and makes minor adjustments. Checks the fittings of the meters.
4610	Motor Fitter/ Technician (Electronic)	Fits and assembles Electronic Motor as required and does necessary repairs himself.
4611	Mud Attendant	Prepares drilling mud of required consistency by mixing clay and chemicals in specified proportions and controls mud circulation pumps. Mixes clay, chemicals and water in required proportions to soften earth formation for drilling operations.
4612	COC Plant Opt.	Implements safety measures in regard to operation of plant/machinery and in handling and processing materials such as acids, oils and maintains machinery.
4613	Pointsman	Operates crossing points, couples and uncouples wagons, signals loco drivers and goes along with loco. Also cleans, oils and greases loco running parts.
4614	Process man	Processes chemical Ingredients by mixing in specific proportions, heating, distilling, cooling, filtering, blending, percolating, refining, pulverising, etc for causing chemical reactions for production.
4615	Production Man/Production Second Man	Drives and operates wings tractor. Goes up the derrick with cat-line, passes it over crown pulley and stays there to rig up the lock line.
4616	Production Rig Man	Responsible for erection and dismantling of production derrick.

4617	Production Station Operator	Operates the indirect heaters and gas/oil separators and oil despatching pumps. Also responsible for the maintenance and repairs. Supervises the workers in the shift.
4618	Rig Building Man	Responsible for erection and dismantling of drilling and production derrick.
4619	Rig Man Drilling	Works on derrick floor, operates tongs, slips, spinning ropes, etc. Clamps elevator, repair chains, rolls pipe and casings on rack. Lifts and shifts materials. Works on rigs at drill site and maintains them.
4620	Road Roller Driver	Drives steam or diesel road roller to consolidate and level roads, pavement or other surface to desired compact and smoothness.
4621	Tank Gauzer	Controls flow lines in oil head tanks, dries off accumulated moisture by operating steam, heating valves and delivers oil to oil pumps.
4622	Topeman	Works with Rigman other persons on the Rig (a set up for drilling at a particular place to locate a gas/oil). Work involves tripping and drilling.
4623	Fireman Gr-I	Seniormost Fireman who is overall incharge of boiler operations for steam generation at required pressure.
4624	Fireman Gr-II	Incharge of Coals and Boiler to generate steam at required pressure.
4625	Fireman Gr-III	Shovels coal into boiler to generate steam at required pressure. Adjusts steam pressure by regulating feed of coal and water.
4626	Jr. Fireman	Assists Fireman Gr-II in boiler operations to generate steam at required pressure. Adjusts steam pressure by regulating feed of coal and water.

OCCUPATIONAL WAGE SURVEY (7th ROUND)

Block-I Identification Particulars

1. NIC at the time of visit (5 digit level)
(to be filled by supervisor)

--	--	--	--	--

2. Description of the Industry/Activity

7. Sector Code
(Public-1, Private-2, Joint-3)

--

8. Rural/Urban
(Code: Rural-1; Urban-2)

--

3. Stratum Code

--

9. Reference Date

30	June	2016
----	------	------

4. Size Group Code
(for Upper-1, Lower-2)

--

10. Number of Persons employed on the Reference Date

Manual	Non-Manual	Total

5. Frame Serial Number

--

6. Sample Serial Number

--

11. Name of the Establishment

12. Complete Postal Address with Name of Person Contacted

13. E-mail address and Phone No.

14. Name and Address of the Employer's Association of which the Employer is a Member.

15. In case of Substitution, the reasons thereof:
(Code: Unit not in existence-1, Unit locked out for some time / temporary shutdown-2, Not permitting to access-3, Adequate co-operation was not extended-4)

--

16. Is the Unit covered by any Wage Agreement? If yes, attach a copy.
(Yes-1, No-2)

--

Sample Sl. No.

Block II EMPLOYMENT

(A) TIME – RATED WORKERS

*Men-1, Women-2, Adolescents-3 & Children-4,

****Regular-1, Contract-2, Casual-3 & Apprentice-4.**

Sample Sl. No.

Block II EMPLOYMENT

(B) PIECE-RATED WORKERS

*Men-1, Women-2, Adolescents-3 & Children-4,

**Regular-1, Contract-2,Casual-3 & Apprentice-4.

Block III Wage Rates

(A) TIME-RATED WORKERS FOR FULL TIME

***Men-1,Women-2, Adolescents-3 & Children-4, **Regular-1,Contract-2,Casual-3 & Apprentice-4.**

*** Ignorance about Law-1, Difference in Output-2, Difference in length of Service in Occupation-3, Difference in Edu. Qualification-4, Difference in Experience-5, Any other reason(Specify)-6.

Sample Sl. No.

Block III Wage Rates

(B) PIECE-RATED WORKER FOR FULL TIME

*Men-1, Women-2, Adolescents-3 & Children-4, **Regular-1, Contract-2, Casual-3 & Apprentice-4.

*** Ignorance about Law-1, Difference in Output-2, Difference in length of Service in Occupation-3, Difference in Edu. Qualification-4, Difference in Experience-5, Any other reason(Specify)-6.

BLOCK-IV

DEARNESS ALLOWANCES*

- 1. Whether separate DA is paid in the unit?
(Yes-1 & No-2)**

 2. If, Yes, indicate the number of persons receiving DA according to

2.1 Consumer Price Index (Labour Bureau-1, State Series-2)

Code	Number
Code	Number

CPI in combination with others
(Flat Rate-1, Pay scales/Slabs-2 &
Other Methods(Specify)-3)

Code	Number
Code	Number
Code	Number

Any other Series

Number

2.2 No. of Persons not getting DA

ANSWER

2.3 Total Number of Persons

3. If DA(part or whole) is paid according to Consumer Price Index, please give the following information about the index used:

3.1 (a) Labour Bureau Series/ State Series\$

(b) (b) Base Year(ccYY)

--	--	--

(c) Centre Name(AICPI/Specify)

(d)

3.2 Mention the rates at which DA is being paid and the number of persons covered by each rate:

*Information on DA pertains to both manual and non manual workers.

Information on DTH pertains to both the
\$ Labour Bureau Series-1, State Series-2.

BLOCK-V PAY ROLL EARNINGS OF SAMPLE WORKERS

*Men-1, Women-2, Adolescents-3 & Children-4.

****Regular-1, Contract-2 & Casual-3.**

*****Time-Rated-1 & Piece-Rated-2,**

******Daily-1, Weekly-2, Fortnightly-3 & Monthly-4**

Note: For persons with Code 2 in Col. 9, the data in Cols. 10 & 11 will be reduced to per day basis and the Code in Col. 12 will be 1.

BLOCK-V PAY ROLL EARNINGS OF SAMPLE WORKERS

**** During the Pay Period under Reference date.**

BLOCK-V PAY ROLL EARNINGS OF SAMPLE WORKERS

BLOCK-VI**PARTICULARS OF FIELD OPERATIONS****FOR FIELD OFFICER ONLY**

1. Name of the Field Officer _____

2. Date of investigation From _____ To _____

3. Date of dispatch of the Schedule
to the Supervising Officer _____

4. Signature of the Field Officer _____

Comments/Remarks**A. FOR SUPERVISING OFFICER ONLY**

5. Name of the Supervising Officer _____

6. Date of receipt of Schedule _____

7. Date of dispatch of the Schedule to the
Headquarters after scrutiny/ rectification _____8. Signature(s) of the official(s) scrutinizing
the Schedule _____**Comments/Remarks**

BLOCK-VII**FOR HEADQUARTER USE ONLY**

1. **Date of receipt and Diary No. of the Schedule** _____
2. **Name of the official(s) Scrutinizing the Schedule** _____
3. **Date of Scrutiny/Rectification** _____
4. **Signature(s) of the official(s) scrutinizing the Schedule** _____

.....about the Labour Bureau

An apex organization for providing data base at the national level for policy formulation, evaluation and research, the Labour Bureau in the Union Ministry of Labour and Employment is the epicenter of all activities involving planning, collection and dissemination of data on various facets of Labour which forms a sound basis for decision making in the Government, industry and by various other user organizations/individuals. Labour Bureau is a store house of important economic indicators like the Consumer Price Index Numbers for industrial and agricultural workers, wage rates, industrial relations, socio-economic conditions in unorganized sector, evaluation and review of working of labour legislations in the country and the like. Labour Bureau has been providing an uninterrupted service to the national and international fora like ILO for the last fifty years. Today, it has assumed an important role in the labour matters and has acquired an un-disputed and indispensable status in the field of labour statistics. Equipped with the expertise of conducting surveys at the national/regional level in diverse fields and in providing in-depth analysis, the organization continues in its pursuit of excellence.
